"Of Aims and Intentions"
INTRODUCTION.

The following bibliography was prepared by Miss Cockrill, first as a card catalogue and cross reference index for the use of the Survey, and then for publication for general use.

As is readily seen, a large amount of geologic work has already been done in Tennessee. While many of these reports and papers are out of print or can be obtained only with difficulty, on the other hand, many of them can be obtained for the asking or at a relatively small cost.

It is the purpose of the present State Survey to prepare a series of bulletins summarizing all that is now known of the different mineral resources, and the different counties, and in many cases, these summaries will cover all of the facts presented in the earlier reports, and to that extent will, for practical purposes, entirely supersede those reports; but no attempt to duplicate the detailed earlier reports will be made until such time as the Survey's own detailed work shall have covered that area, resource or problem.

For example, the Columbia folio by the U. S. Geological Survey is a beautiful piece of work and mapping, describing the phosphate rocks occurring in that region, the rocks in which the phosphates occur, their probable origin, their general distribution, their general chemical character, but no details are given. In the progress of its detailed study of the phosphate rocks, the State Survey will ultimately hope to publish, not only detailed maps of the phosphate deposits, but detailed descriptions of all the deposits, giving, as far as possible, detailed sections, description of extent, analyses, etc. But meanwhile many people may want to refer to the Columbia folio if they know of its existence. So, too, the Columbia folio describes some interesting embayment deposits. Ultimately the State Survey hopes to trace those deposits to their natural limits, but it may be some years before that can be done, and in the meanwhile many people would be interested in the facts brought out even in as limited an area as that covered by the Columbia folio.

Therefore, it has been felt that it would be a distinct service to publish a list of the reports and papers that have been written on the geology, soils, drainage and forestry of Tennessee. The bibliography makes no pretense to being complete, especially in the cross indexing (as many of the earlier papers, especially, are not contained in the State Geologist's private library, which, for the time being, must serve the needs of the new Survey).

But it was felt it would be of more value to bring the list out without delay, rather than to wait the several years that are usually necessary to search out the few additional titles to make it complete.

In preparing the bibliography, Miss Cockrill has made use of the various bibliographies on geology issued by the U. S. Geological Survey, and has supplemented that by lists kindly furnished by the several bureaus of the Agricultural Department, Coast and Geodetic Survey, etc., and by such other titles as could be learned of from the people in the State. In this work she has received a large amount of assistance from Professor Glenn,
who has gone through all of the geological library of Vanderbilt University, including Professor Safford's books, so that including a large number of titles from the reports of the Chief of Engineers, State Board of Health, and similar publications, he added nearly a thousand titles to those previously obtained. Mr. Nelson has aided in preparing the index and in the proof reading.

The government reports are usually to be obtained by request from the heads of the several bureaus, thus letters for such reports should be addressed to: The Director, U. S. Geological Survey, Washington, D. C.; The Superintendent of the Coast and Geodetic Survey, Washington, D. C.; The Director, Office of Public Roads, Agricultural Department, Washington, D. C.; Chief of Bureau of Soils, Department of Agriculture, Washington, D. C.; Chief Forester, Forest Service, Washington, D. C., etc. A few of the publications are sale publications, such as the topographic atlas sheets and the folios of the U. S. Geological Survey. In these cases, the charges made are simply to cover the cost of printing and binding. The topographic atlas sheets can be obtained at a cost of five cents each, and the folios for twenty-five cents each (stamps not accepted). In some cases the supply of these publications for distribution for the several bureaus will be found to have been exhausted. Application should then be made to the Superintendent of Documents, Washington, D. C., from whom they may be purchased at the cost of publication. If the supply of that official is exhausted, they can only be obtained from second hand book dealers, or from people to whom they were previously sent. Many of these publications can be consulted at the libraries, as most of the libraries receive full sets of the government publications.

Nashville.

      nessee, Georgia and Alabama.

Campbell (Marius R.).

C.

1. Standingstone folio, Tennessee.
   Describes the general physiographic and geologic features, the character
   and occurrence of the Silurian, Devonian and Carboniferous rocks, and
   the occurrence of coal in the quadrangle. Includes topographic, geologic
   and economic maps and structure section.

   Describes the general relations of the region, the physiography, the oc-
   currence and character of the Cambrian, Silurian, Devonian and Carbon-
   iferous strata, the geological structure, and the economic resources.

   Describes the physiography and drainage of the region, the character and
   occurrence of the Cambrian, Cambro-Silurian, Silurian, Devonian and
   Carboniferous strata, and the geologic structure, and the coal deposits
   included in the area of the sheet. Gives the section of several coal out-
   crops, and a table of coal analyses. Includes topographic colored areal
   geologic, economic geologic, and structure section maps, and a sheet of
   columnar sections.

The formation of natural bridges.
Suggests the following theory to account for the origin of the natural bridges at North Adams, Mass., Lexington, Va., Chattanooga, Tenn., in Utah, and in the Yellowstone National Park: "Before the formation of the bridge the stream which now flows under then flowed upon the surface of what is now the arch and probably plunged over a fall a short distance below the present site of the bridge. A portion of the water percolating through a joint plane or crack upstream discharged into a stream under the fall and gradually enlarged its passage of its solvent power. In the course of time this passage became sufficiently large to contain all of the water of the stream, and the bridge resulted."

Dodge (R. E.).
The Cretaceous and Tertiary Peneplains of eastern Tennessee.
Amer. Geol., vol. 17, p. 264, 1896 (abs.).

Dole (R. B.).
The quality of surface waters in the United States. Part I. Analyses of waters east of the one hundredth meridian.

Duffield (M. S.).
The Cumberland Plateau coal field (Tennessee).
Eng. and Mg. Jour., vol. 74, pp. 442-443, 2 figs., 1902.
Describes the geology of this area, and gives a geological section of the Cumberland Plateau.

Dunnington (F. P.).
Distribution of titanio oxide upon the surface of the earth.

E.

Eakins (L. G.).
A new meteorite from Hamblen County, Tennessee.
Gives the chemical composition of the metallic and siliceous portions of the meteotic mass.

East Tennessee Land Company.
Expert reports on the mineral properties of the East Tennessee Land Company.
By Dr. George A. Koenig, Dr. James M. Safford, Jo. C. Guild, J. D. Roberts and L. E. Bryant, 44 pp., maps, New York, 1891.

Eaton (E. M.).
See Rathmell (J. R.) and Eaton (E. M.) Committee.
BIBLIOGRAPHY OF TENNESSEE GEOLOGY. 21

Eckel (Edwin C.).
1. A recently discovered extension of the Tennessee white phosphate fields.
   Briefly describes occurrence in Decatur County.

2. The white phosphates of Decatur County, Tenn.
   Describes occurrence of phosphate deposits in this area.

   Describes occurrence, character and utilization of clay deposits in this region.

   Describes the geology of the district, and the character and occurrence of limestones and shales available for cement manufacture.

Eldridge (M. O.).
Public roads of Tennessee.
   Circular No. 48, U. S. Dept. of Agriculture.

Elliott (John B.).
The age of the southern Appalachian.

Engineering Record.
Artesian well pumps at Memphis.
   Short notice of the use of special pumps for 64 wells at Memphis, Tenn.

Evans, (A. W.).
Jellico coal field.
   Describes the occurrence, composition and qualities of coals of the Jellico field in Kentucky and Tennessee.

Ewing (Robert).
Phosphate rock. A plea for wise legislation, which will allow the State, and its citizens, to avail themselves of a source of wealth which should not be lost.
   6 pages. (Private publication.)

Ely (Seneca W.).
Report of a geological reconnaissance of the lands, free-hold and leasehold of the Cumberland Basin Petroleum and Mining Company.
32 pp., 1 map, Knoxville and Cincinnati, 1866.

F.
Faris (R. L.).
1. Terrestrial magnetism. Results of magnetic observations made by the Coast and Geodetic Survey between July 1, 1906, and June 30, 1907.
   Department of Commerce and Labor, Coast and Geodetic Survey, Appendix No. 5, report for 1907, pp. 219, 220.
Faris (R. L.)—Continued.

2. Terrestrial magnetism. Results of magnetic observations made by the Coast and Geodetic Survey between July 1, 1907 and June 30, 1908.
   Department of Commerce and Labor, Coast and Geodetic Survey, Appendix No. 3, report for 1908, pp. 155 and 156.

3. Terrestrial magnetism. Results of magnetic observations made by the Coast and Geodetic Survey, between July 1, 1908, and June 30, 1909.
   Department of Commerce and Labor, Coast and Geodetic Survey, Appendix No. 3, report for 1909, pp. 135-141.

Fay (A. H.).

Barytes in Tennessee.

Featherstonehaugh (G. W.).

1. Excursion through the slaves States; 2 vols., 1844. Gives many notes on the geology of the region traversed, and of the people and country. Chaps. 10 to 14, inclusive.

2. A canoe voyage up the Minnay Sotor.
   2 vols., London, 1847. Vol. 2 describes a trip up the Tennessee River to the Hiwassee River, thence into Georgia, with observations on the geology.

Fernald (Robert H.).

See Holmes (J. A.).

Ferris (Charles).

Tennessee marble as a building stone.
   Univ. of Tenn. Scientific Mag., pp. 19-28, June, 1894.

Ferris (Charles E.).

Fuel value of some Tennessee and Kentucky coals.

Fitch (Graham D.).

Preliminary examination of Wolf River, Tennessee, from its mouth to a point five miles above.
   Also H. Doc. No. 218, 54 Cong., 1st ses.

Fleming (H. S.).

General description of the ores used in the Chattanooga district.

Foerste (August F.).

1. Silurian and Devonian limestones of Tennessee and Kentucky.
   Discusses the occurrence and lithologic character of the Ordovician, Silurian and Devonian series in the southern portion of the Cincinnati anticline, and discusses the evidences of unconformity. Gives list of fossils from several formations at various points in the region.

2. Use of the terms Linden and Clifton limestones in Tennessee geology.

3. Use of the term Linden and Clifton limestones in Tennessee geology.
   Brief note on naming of these formations.
4. Silurian and Devonian limestones of western Tennessee.
   Jour. Geol., vol. 11, pp. 554-583, figs. 1-16, pp. 697-715, figs. 7-10, 1903.
   Describes character, occurrence and correlation of Silurian strata along
   the western side of the Cincinnati geanticline in southern Indiana, Ken-
   tucky and northern Tennessee, and of Silurian and Devonian strata in
   the Tennessee River Valley, and discusses evidences for the age of the
   Cincinnati geanticline, and gives lists of fossils, with brief descriptions
   of some forms.

5. The Cincinnati group in western Tennessee, between the Tennessee River
   and the Central Basin.
   Jour. Geol., vol. 11, pp. 29-45, 1 fig., 1903.
   Discusses the subdivisions of the Cincinnati group in Ohio, names and
   describes the subdivisions in Tennessee, and gives localities of outcrops,
   and notes on characteristic fossils.

6. Variation in thickness of the subdivisions of the Ordovician of Indiana,
   with notes on the range of certain fossils.
   Am. Geol., vol. 34, pp. 87-102, 1 pi., 1904.

7. The age of the Cincinnati anticlinal.
   Am. Geol., vol. 7, pp. 97-109, 1891.

8. Preliminary notes on Cincinnatian and Lexington fossils of Ohio, Indiana,
   Kentucky and Tennessee.
   16, pp. 17-87, 6 pl., 1910.

9. Notes and comments on Hall's Physical Geology of Tennessee and ad-
   joining districts.
   Amer. Geol., vol. 7, pp. 345-351, 1891.

Foley (John).
1. Conservative lumbering at Sewanee, Tenn.

2. A working plan for southern hardwoods and its results.
   Year Book of the Department of Agriculture, Extract 249, 1901.

Ford (George W.).
1. Second Annual report of the Commissioner of Labor and Inspector of
   Mines.
   p. 376, Nashville, 1893.

2. Special report of the Commissioner of Labor and Inspector of Mines.
   104 pp., 800. Nashville, 1891.

Foster (— —).

Foster (J. W.).
The Mississippi Valley, its physical geography, including sketches of the
   topography, botany, climate, geology and mineral resources, and of
   the progress of development in population and material wealth.

Foster (H. D.) and Ashe (W. W.).
Chestnut oak in the southern Appalachians.
Foster (Wilbur F.).
On the topography of Nashville.
Second report of the Board of Health of Nashville, pp. 133-144, Nashville, 1877.

Foster (Maj. W. W.).
Topographical map of Nashville and vicinity.
Published in 1877.

Fuller (M. L.).
Bibliographic review and index of papers relating to underground waters published by the United States Geological Survey, 1879; 904.
Lists all references to underground waters, springs, well records and drilling methods, and gives detailed classified subject index.

Gannett (Henry).
1. Boundaries of (Tennessee).
4. Results of primary triangulation (in Tennessee.)
5. Results of primary triangulation and primary traverse (in Tennessee.)

Garrett (W. R.).
Northern boundary line of Tennessee.
Amer. Hist. Mag., vol. 6, pp. 18-40, 1901.

Garrison (F. Lynwood).
The iron ores of Shady Valley, Tennessee.
Describes the geology and the occurrence, character and relations of the iron-ore deposits.

Gates (Robert).
(National resources of) Tennessee.

Gattinger (Augustin).
The flora of Tennessee.
Published through the Bureau of Agriculture, Nashville, 1901, 296 pages.

Gattinger (A.).
See Cotton (Henry G.) and Gattinger (A.).

Gaw (William B.).
Report on examinations and surveys on the Tennessee River.
Gilbert (Lyman W.).

East Tennessee copper mines.

Mining Mag., vol. 4, pp. 89-90, 1855.

Gilman (D. C.).

Prof. Guyot's measurements of the Allegheny system.

Gilmore (O. A.), Pres. Miss. River Commn.).

Senate Ex. Doc. No. 10, 47th Cong., 1st Sess., 1882. Contains levels, high and low water profiles, and location, logs, and plotted sections of many borings between Cairo and Memphis.

Glenn (Leonidas C.).

1. Notes on a new meteorite from Hendersonville, N. C., and additional pieces of the Smithville, Tenn., fall.

2. Fossiliferous sandstone dikes in the Eocene of Tennessee and Kentucky.

3. The more common minerals of the region about Nashville (Tennessee).

4. Notes on the wells, springs and general water resources of Tennessee.

U. S. Geol. Surv., Water Supply and Irrigation Paper No. 102, pp. 358-367, 1904. Describes the underground water resources by physiographic provinces.

5. Gerard Troost.

Am. Geol., vol. 35, pp. 72-94, 1 pl. (por.), 1905. Includes a discussion of Troost's reports as State Geologist and a list of his published writings.

6. Underground waters of Tennessee and Kentucky west of Tennessee River, and of an adjacent area in Illinois.

6a. Geology and mineral resources of part of the Cumberland Gap coal field, Kentucky.

See Ashley and Glenn No. 77.

8. The hydrology and geology of the Gulf embayment area of West Tennessee, West Kentucky and Southern Illinois.

Glenn (Leonidas C.)—Continued.

10. (Notes on the underground water of) Tennessee and Kentucky.

11. The influence of forests on streams.

Glenn (L. C.).
   See Ashley (Geo. H.) and Glenn (L. C.)

Geib (W. J.).
   See Wilden (H. J.) and Geib (W. J.)

Goethals (George W.).
1. Improvement of Tennessee River between Chattanooga, Tennessee, and foot of Bee Tree Shoals, Alabama (260 miles).

2. Operating and care of Muscle Shoals canal, Tennessee River.

3. Operating and care of Muscle Shoals canal, Tennessee River.

4. Improvement of Tennessee River between Chattanooga, Tennessee, and foot of Bee Tree Shoals, Alabama (260 miles).

5. Improvement of Tennessee River between Chattanooga, Tennessee, and foot of Bee Tree Shoals, Alabama (260 miles).

6. Operating and care of Muscle Shoals canal, Tennessee River.

7. Improvement of Tennessee River between Chattanooga, Tennessee, and foot of Bee Tree Shoals, Alabama (260 miles).
   Chief of Eng. Rept., 1891, pt. 4, pp. 2303-2322, 1 map.

8. Operating and care of Muscle Shoals canal, Tennessee River.

Gordon (Charles H.).
1. Coal fields of Tennessee.
   Appalachian Trade Journal pp. 11-12, June, 1909.

3. The zinc deposits of Tennessee.

Gottsberger (B. B.).
   Mines and workings of the Tennessee Copper Company.
   Mining World, vol. 29, 1908, pp. 911-914.

Gray (W. M.).
   See Ayrs (O. L.) and Gray (W. M.).

Greeley (W. B.) and Ashe (W. W.).
   White oak in the southern Appalachians.
   U. S. Department of Agriculture, Forest Service, Circular No. 105, 1907.
Greenleaf (James L.)
Water powers on eastern tributaries of the Mississippi, between the Ohio and the Yazoo.

Grover (N. C.).
See Hall (M. R.), Grover (N. C.) and Horton (A. H.).

Guild (Jo. C.).
1. Report on the Tennessee River and Walden’s Ridge iron ores, the Walden’s Ridge coal field and the Carter County magnetic and limonite iron ores.
   Contains his first, second and third semi-annual reports.

Gurley (William F. E.).
See Miller (S. A.) and Gurley (Wm. F. E.)

Guyot (Arnold).
1. On the Appalachian mountain system.
   Gives numerous elevations on the Tennessee-North Coralina line.
   Asheville News, July 18, 1860.
   Reprinted in Clingman, Thomas L., speeches and writings, pp. 138-147, Raleigh, 1877.
   Includes height of numerous peaks on the Tennessee line.

Hall (Frederick).
Letters from the East and from the West.
168 pp. 800, Washington, 1840.
Brief reference to minerals about Nashville, chap. 19, on pp. 149-160.
Describes a visit to Nashville with remarks on the geology and the collection and work of Prof. Troost.

Hall (J.).
1. Notes upon the geology of the Western States.
2. Geology of New York, part 4 (fourth or western district).
   Vol. XXVII, 685 pages, 54 plates, geological map of the Middle and Western States, 1843.
3. Notes explanatory of a section from Cleveland, Ohio, to the Mississippi River, in a southwest direction, with remarks upon the identity of the western formations with those of New York.
4. On the parallelism of the Paleozoic deposits of North America with those of Europe, followed by a table of the species of fossils common to the continents, with indication of the positions in which they occur, and terminated by a critical examination of each of the species, by Ed. de Vermeuil.
   Translated and condensed from Bull. Geol. Soc. France, 2d ser., vol. IV, for this journal.
Hall (J.)—Continued.

5. Paleontology (of New York).
   Vol. 3, containing descriptions and figures of the organic remains of the lower Helderberg group and the Oriskany sandstone, 1855-1859 (with volume of 120 plates, 1861), vol. XII, 523 pages.

6. Comparison of the geological features of Tennessee with those of the State of New York.

7. On the relations of the middle and upper Silurian (Clinton, Niagara and Helderberg) rocks of the United States.
   Geol. Mag., vol. 9, pp. 509-513.

8. Contributions to the geological history of the American continent.

Hall (M. R.), Johnson (E.) Jr., and Hoyt (John C.).
   Report of progress of stream measurements for the calendar year, 1904.
   Part V. Eastern Mississippi River drainage.

Hall (M. R.), Hanna (F. W.) and Hoyt (J. C.).
   Report of progress of stream measurements for the calendar year, 1905.
   Part V. Ohio and lower western Mississippi River drainages.

Hall (M. R.), Grover (N. C.) and Horton (A. H.).
   Surface water supply of Ohio and lower eastern Mississippi River drainages, 1906.

Hall (W. Carvel) and Hoyt (John C.).
   River Surveys and profiles made during 1903.

Hall (Wm. L.).
   The waning hardwood supply and the Appalachian forests.

Hampton (S. W.) et al.
   Report of Water Committee on public water supply for the city of Memphis, 1886, pp. 72.

Hanna (F. W.).
   See Hall (M. R.), Hanna (F. W.) and Hoyt (John C.).

Hargis (A. D.).

Harper (D.).
1. Geological section across the Cumberland Mountains of White to Roane County, Tennessee.
   29 pp.
Harper (D.)—Continued.

   Nashville, 1865, 12 pp.

Harper (Louis).

   15 pp., Nashville, 1865.
   20 pp., Louisville, 1865.
   12 pp., Nashville, 1865.
   8 pp., Nashville, 1866.

Harris (Gilbert D.).

1. The Midway stage.
   Am. Pal., Bull., vol. 1, No. 4, 125 pp., 15 pls.
2. The Lignitic stage.
   Am. Pal., Bull., vol. 2, No. 9, 1897, pp. 3-102, 15 pls.

Harts (Wm. W.).

1. Forestry and stream flow.
2. Improvement of Tennessee River.
3. Operating and care of Muscle Shoals canal, Tennessee River.
5. Improvement of Clinch, Hiwassee and Holston Rivers, Tennessee.
8. Operating and care of Muscle Shoals canal, Tennessee River.
9. Improvement of Tennessee River.
10. Operating and care of locks and dams on Cumberland River.
12. Improvement of Cumberland River, Tennessee and Kentucky.
13. Improvement of Obion and Forked Deer Rivers, Tennessee.
Harts (Wm. W.)—Continued.

15. Improvement of French Broad and Little Pigeon Rivers, Tennessee.

17. Improvement of Tennessee River.

19. Operating and care of locks and dams on Cumberland River.

20. Improvement of Cumberland River, Tennessee and Kentucky.

22. Improvement of Clinch, Hiwassee and Holston Rivers, Tennessee.

25. Improvement of Tennessee River.

27. Operating and care of locks and dams on Cumberland River.

28. Improvement of Cumberland River, Tennessee and Kentucky.

29. Improvement of Obion and Forked Deer Rivers, Tennessee.

Hayden (H. H.).

Fluorspar in Tennessee.

Hayes (C. Willard).

1. The overthrust faults of the southern Appalachians.

2. Tennessee white phosphate.
   Describes the character, occurrence and origin of the phosphates of Perry County.
Hayes (C. Willard)—Continued.

   Describes the topographic features of the district, its drainage systems, the stratigraphy of the Cambrian, Silurian, Devonian, and Carboniferous strata and their structural relations.

4. Chattanooga sheet. (Tennessee.)
   Describes the topography of the area, the character and relations of the Cambrian, Silurian, Devonian, and Carboniferous formations, their structure and the mineral resources. Accompanied by topographic colored areal and economic and structure section maps and a sheet of columnar sections.

5. Kingston sheet. (Tennessee.)
   Describes the topography of the area, the character, structure, and relations of the Cambrian, Silurian, Devonian, and Carboniferous rocks, the mineral resources and soils. Accompanied by topographic colored areal and economic geologic and structure section maps.

6. Ringgold sheet. (Tennessee and Georgia.)
   Describes the topography of the region, the stratigraphy of the Cambrian, Silurian, Devonian, and Carboniferous rocks, their structure and mineral resources. Accompanied by topographic, colored areal and economic, geologic and structure section maps.

7. Ringgold folio, Georgia and Tennessee.
   Describes the geography and the occurrence and character of the Cambrian, Silurian, Devonian, and Carboniferous strata and the mineral resources, including coal, iron, and the soils of the region. Includes topographic, colored areal geologic, economic geologic, and structure section maps and a sheet of columnar sections.

   Describes the geography and drainage, the occurrence and lithologic character of the Cambrian, Silurian, Devonian, and Carboniferous strata and geologic structure and the occurrence of coal, iron ores, and soils of the region. Includes topographic, colored areal geologic, economic and structure section maps and a sheet of columnar sections.

   Describes the physiography, the occurrence and distribution of the Cambrian, Silurian, Devonian, and Carboniferous strata, the geologic structure, and the coal and iron deposits and soils of the region. Includes topographic, colored areal geologic, economic geologic, and structure section maps and a sheet of columnar sections.

10. Sewanee folio, Tennessee.
   Describes the physiography and drainage of the region, the occurrence and distribution of the Silurian, Devonian, and Carboniferous strata, the geologic structure and the mineral resources, including coal and iron. Contains topographic, colored areal geologic, economic geologic, and structure sections maps and a sheet of columnar sections.
11. The southern Appalachians.
   Describes the physiographic divisions of the region, their drainage, and
   the history of their development.

12. The Tennessee phosphates.
   Describes the character and occurrence of the phosphates in Devonian
   strata and the local characters of the various deposits. Discusses the
   origin of the deposits. Accompanied by a map of the phosphate region
   and vertical sections.

   Describes the physiography of the region, the character and distribution
   of the Silurian, Devonian, and Carboniferous rocks, and the geologic
   structure of the region. Describes the occurrence of coal, iron,
   building stone, road material, clay, and the character of the soil. Contains
   topographic, colored areal geologic, economic geologic, and structure
   section maps and vertical sections.

   Describes the geography and stratigraphy of the region, the character
   and distribution of the Algonkian, Cambrian, Silurian, Devonian, and
   Carboniferous rocks, the geologic structure and the occurrence of iron,
   lead, building stone, clay, and soils. Contains topographic, colored areal
   geologic, economic geologic, and structure section maps and a sheet of
   columnar sections.

15. Pikeville folio, Tennessee.
   Describes the geography, topography, and stratigraphy of the region, the
   character and distribution of the Silurian, Devonian, and Carboniferous
   rocks, the geologic structure, and the occurrence of coal, iron, building
   stone, clay, and soils. Accompanied by topographic, colored areal geologic,
   economic geologic, and structure section maps and a sheet of columnar sections.

   Describes the geography, topography, and stratigraphy of the region, the
   character and distribution of the Silurian, Devonian, and Carboniferous
   formations, the geologic structure, and the occurrence of the coal, iron,
   building stone, clay, and soils. Gives a generalized section and two
   vertical sections of the coal beds. Accompanied by topographic, colored areal
   geologic, economic geologic, and structure section maps.

17. The Tennessee phosphates.
   Describes the general physiographic and stratigraphic features of the re-
   gion, and the character and distribution of the black and white phos-
   phate. Discusses their origin.

18. The white phosphates of Tennessee.
   Describes the location, occurrence, and physical and chemical character of
   the phosphate deposits, and discusses their origin.

19. Physiography of the Chattanooga district in Tennessee, Georgia and
   Alabama.
BIBLIOGRAPHY OF TENNESSEE GEOLOGY. 33

Hayes (C. Willard)—Continued.

20. A brief reconnaissance of the Tennessee phosphate fields.
   Describes the occurrence and character of the phosphate deposits.

21. The geological relations of the Tennessee brown phosphate.
   Briefly describes the character and mode of formation of the deposits.

   Describes varieties of white phosphate, the origin and extent of the deposits, and possible extensions of the field.

23. The Southern Appalachian coal field.
   Describes extent, general geologic relations, structure and stratigraphy of the field, the character and occurrence of the coal beds, the composition, properties and production of coal.

25. Tennessee phosphates.

Hayes (C. Willard) and Campbell (M. R.).

Geomorphology of the southern Appalachians.
   Nat. Geog. Mag., vol. VI, pp. 63-126, pls.4-6, 1894.
   Reviews the previous work in the region. Describes the several types of the deformed Cretaceous peneplain, the deformation of the Cretaceous and Tertiary peneplains, and the drainage development as affected by dynamic movements. Includes a discussion of the sedimentary record.

Hayes (C. Willard) and Ulrich (Edward O.).

Columbia folio, Tennessee.
   Describes general relations and topography, character and occurrence of Ordovician, Silurian, Devonian, and Carboniferous strata, geologic structure and history and mineral resources, including the occurrence, character, and origin of the phosphates. Includes a correlation table of Paleozoic formations and a generalized faunal chart for the western side of the Middle Tennessee Basin.

Haywood (John).

(Geological features.)
   The natural and aboriginal history of Tennessee, Nashville, 1823. (Not seen.)

Head (Jeremiah).

The coal industry of the Southeastern States of North America.
   Describes the character and occurrence of coal in the southern Appalachian region.

Head (William R.).

(Catalogue of) Paleozoic sponges of North America.
   11 pp. 800, Chicago, 1895.
Heilprin (A.).
1. The Tertiary geology of the eastern and southern United States.  
2. Contributions of the Tertiary geology and paleontology of the United States. 
117 pages, map, 4°, Philadelphia, 1884.

Henrich (Carl).
The Ducktown ore deposits and the treatment of the Ducktown copper ores (Tennessee).  
Gives a historical sketch of mining in this region, describes the geologic structure of the ore deposits and the physical and chemical characters of the copper ores, and discusses the genesis of the ore deposits. The paper contains a sketch map and cross sections of the ore deposits.

Hermany (Charles).
Report of the Chief Engineer to the Waterworks and Sewerage Commissioners, upon public water supply and system of drainage for City of Memphis.  
2d edition, 1885, pp. 127.

Herzig (C. S.).
Tennessee barytes.  

Hider (Arthur), Omberg (J. A.) Jr., and Bell (T. A.).
Engineers’ Report on the waterworks system of Memphis, Tenn.  
46 pp., maps and plates, Memphis, 1902.

Higgins (E.).
1. Iron operations in Chattanooga district.  
2. Mining and smelting in the Ducktown district.  

Hilgard (Eugene W.).
1. General features of the alluvial plain of the Mississippi River below the mouth of the Ohio.  
2. Orange sand, Lagrange and Appomattox. 
3. On the Quaternary formations of the State of Mississippi.  
4. Review of the general soil map of the cotton states.  
5. Loess of the Mississippi valley and the aeolian hypothesis. 
6. Remarks on the drift of the Western and Southern States and its relation to the glacier and iceberg theories. 
BIBLIOGRAPHY OF TENNESSEE GEOLOGY.

Hilgard (Eugene W.)—Continued.

7. (Mode of the deposition of the Lafayette formation in the Mississippi valley.)

8. The age and origin of the Lafayette formation.

Hilgard (S. P.).

On the geological history of the Gulf of Mexico.
   Louisiana State Univ., Report of Superintendent for 1871, pp. 207-222,
   New Orleans, 1872.
   Discussion by C. Whittlesey, C. A. White, A. Winchell, C. Little, Perry,
   Additional note by Hilgard, p. 523.

Hill (D. H.).

Discussed by R. W. Raymond, pp. 129-130, 131.

3. On some points in American geology.
Canadian Nat., vol. 6, pp. 81-105, 1861.

4. The decay of rocks geologically considered.

5. On the geognosy of the Appalachian system.
BIBLIOGRAPHY OF TENNESSEE GEOLOGY.

Huntingdon (Oliver Whipple).

1. The Smithville meteoric iron.
   Gives a chemical analysis of the material and an account of the finding
   of other meteoric iron masses in this portion of Tennessee, and the
   evidences indicating that they possess common characteristics and may
   have formed originally a part of the same mass.

2. Catalogue of all recorded meteorites.
   Also, 110 pp. 800, Cambridge, 1887.
   Lists numerous Tennessee meteorites.

Imboden (I. D.).

(Mineral resources of) Upper East Tennessee.
   The Mineral and Agricultural resources of East Tennessee, etc., pp. 40-54,
   Knoxville, 1883.

Ingalls (W. R.).

Production and properties of zinc.
   New York, 1902, pp. 197-203.

J.

Johnson (Douglas Wilson).

The tertiary history of the Tennessee River.
   Jour. Geol., vol. 13, pp. 194-231, 9 figs., 1905.

Johnson (E.) Jr.

See Hall (M. R.), Johnson (E) Jr., and Hoyt (John C.).

Johnson (Guy R.).

1. The Embreeville estate, Tennessee.
   Describes the geology of the region and the occurrence of iron ores.

2. The Embreeville estate, Tennessee.

Johnson (R. O. D.).

Tennessee phosphate.
   Eng. and Min. Jour., vol. 50, pp. 204-207, August 5, 1905.
   Gives notes upon the geology of the phosphate-producing area, and de-
   scribes the origin, occurrence, and character of the phosphate deposits.

Jones (Paul M.).

Geology of Nashville and immediate vicintiy.
   56 pp., map, Nashville, 1892.

Judd (Edward K.).

1. The barytes industry in the South.

2. Soft iron ore in Tennessee.

Jungerman (C. L.).

Report of C. L. Jungerman, Assistant Geologist of the Bureau of Agricu-
   lture, Statistics and Mines, and Acting Inspector of Mines to A. J.
   McWhirter, Commissioner on the Condition of Mines in Tennessee.
   Biennial Rept. Commr. Agriculture, Statistics and Mines for 1883 and 1884,
   pp. 121-135, Nashville, 1885.
Kain (John H.).
Remarks on the mineralogy and geology of the northwestern part of the
State of Virginia and eastern part of the State of Tennessee.

Keith (Arthur).
1. Some stages of Appalachian erosion.
Describes the drainage features, surface forms, and variations of level
in the southern Appalachians, and the peneplains of the Tennessee
Basin.

2. Geology of Chilhowee Mountain in Tennessee.
States that the structure is synclinal and the mountain is formed of the
oldest sedimentary rocks. Discusses the lithologic evidences bearing on
the age of the limestone series and the contact relations of the beds.
Concludes that the Chilhowee-Knox interval indicates that the Appa-
lachian folding and faulting began after the deposition of the first Pale-
orzoic beds instead of the last.

Describes the general relations of the Greeneville quadrangle, its detailed
geography, the general geological structure of the area, the character,
occurrence, and relations of Archean, Cambrian, Ordovician, Silurian,
and Carboniferous rocks, and the mineral resources.

Describes the topographic features and the geologic history of the quad-
rangle, the character and occurrence of the Carboniferous rocks, the
geologic structure, and the occurrence of coal and petroleum. Includes
topographic and geologic maps.

Describes the physiography of the region, the character and distribution of the Ocoee group, the Cambrian, Silurian Devonian, and Carboniferous
rocks, the structure of the region, and the occurrence of marble, build-
ing stone, lime and clay. Includes topographic, colored areal geo-
logic, economic geologic, and structure section maps.

Describes the physiographic and stratigraphic features of the region, the
character and distribution of certain rocks of unknown age and of the
Cambrian, Silurian, Devonian, and Carboniferous strata, the geologic
structure of the region, and the occurrence of coal and building stones.
Includes topographic, geologic, and structure section maps and a sheeet
of columnar sections.

Describes the physical features of the Appalachian province, the topo-
graphic and stratigraphic features of the quadrangle, the character and
distribution of the Cambrian, Silurian, Devonian, and Carboniferous
strata, the geologic structure, and the occurrence of coal, marble, iron,
clay, and building stones. Includes topographic, geologic, and structure
section maps.
BIBLIOGRAPHY OF TENNESSEE GEOLOGY.

Keith (Arthur)—Continued.

8. Description of the Roane Mountain quadrangle (Tennessee-North Carolina.)
   Describes the geography, the occurrence, character, and relations of pre-Cambrian, Cambrian, Ordovician, and Triassic (?) sedimentary and igneous rocks, the geologic structure and the mineral and water resources.

   Describes the geography, physiographic features, the general geology, the occurrence, character, and relations of Archean, Cambrian and Triassic (?) rocks, the geologic structure and economic resources.

10. Recent zinc mining in East Tennessee.
    Describes the general geology, character, occurrence, and origin of the zinc ore deposits.

    Describes the geographic relations and drainage, the geologic history, the character, occurrence, and relations of Archean, Algonkian (?) Cambrian, and Ordovician rocks, the geologic structure, and the mineral resources of the area.

12. Folded faults of the southern Appalachians.
    Congr. geol. intern., Compte rendu, 9th Sess., pp. 541-545, 1904.
    Discusses the character and occurrence of overthrust faulting in the southern Appalachian region.

    Describes geographic and topographic features, general geologic relations and structure, character and occurrence of Archean, Algonkian, Cambrian and Juratrias (?) rocks, and mineral resources.

    Describes the character and occurrence of the iron ores of this region.

15. Tennessee marbles.
    Describes the occurrence and character of marble deposits in eastern Tennessee, and locations suitable for quarrying.

    Describes the geographic features, the stratigraphy, the character and occurrence of the Cambrian, Silurian, Devonian, and Carboniferous rocks, the geologic structure, and the mineral resources of the region.

17. Morristown folio, Tennessee.
    Describes the physiographic and stratigraphic features of the region, the occurrence of Cambrian, Silurian, Devonian, and Carboniferous rocks. Discusses the geologic structure and gives an account of the marble and building stone resources. Includes topographic, geologic, and structure section maps and a sheet of columnar sections.
Kelley (D. C.).
Sylviculture in relation to city streets, parks and private grounds.

Kemp (James Furman).
1. Ore deposits of the United States and Canada.
Contains summary of paper read before the New York Academy of Sciences.
3. The deposit of copper ores at Ducktown, Tennessee.
Describes briefly topography of Ducktown, mode of occurrence and character of the ore and associated minerals, and possible origin of the ore bodies.

Kennedy (William).
The central basin of Tennessee. A study of erosion.

Kenworthy (Charles J.).
Roane Mountain, western North Carolina.

Keyes (Charles Rollin).
Mining Tennessee phosphates.
Includes notes on the occurrence of the phosphate deposits of Tennessee.

Killebrew (James B.).
1. Little Sequatchie coal field.
3. Mineral and agricultural resources of the portion of Tennessee along the Cincinnati Southern Railroad.
Also separate, 145 pages, 3 maps, Nashville, 1876.
4. Oil region of Tennessee, with some account of its other resources and capabilities.
Agricultural reports of Tennessee, pp. 1-16, map, Nashville, 1877.
Also separate, 116 pages, Nashville, 1877.
5. Report on the culture and curing of tobacco in the United States.
6. Tennessee. Its agricultural and mineral wealth, with an appendix showing the extent, value and accessibility of its ores, with analyses of the same.
196 pages, map, Nashville, 1876.
7. Resources of Tennessee.
Vol. XI, 88 pages, 3 maps, 1 plate, Nashville, 1874.
8. The western iron belt of Tennessee.
Eng. and Mining Jour., vol. 45, pp. 18-19, 4°, 1888.
BIBLIOGRAPHY OF TENNESSEE GEOLOGY.

Killebrew (James B.)—Continued.

9. The phosphate deposits in Maury County, Tennessee.
   Describes the character and occurrence of phosphate in this county.

    Manufacturer's Record, Reprint, 21 pp.

11. The President's opening address.

12. Necessity of preserving the forests of Tennessee and legislation neces-
    sary for that purpose.
    Tennessee Forest Association, 1902-03, p. 9.

King (W. R.).

1. Preliminary examination with a view to the extension of the survey of
   Caney Fork to Frank's Ferry, Tennessee.
King (W. R.)—Continued.

4. Little Tennessee River, Tennessee.

5. Improvement of Caney Fork River, Tennessee.

8. Improvement of French Broad River, Tennessee.

10. Improvement of Cumberland River, Tennessee and Kentucky.

11. Improvement of Tennessee River.

13. Improvement of Cumberland River, Tennessee and Kentucky.

15. Improvement of French Broad River, Tennessee.

17. Improvement of Duck River, Tennessee.

22. Report in reference to preliminary examinations with a view to placing
    locks and dams on the Cumberland River, from Nashville, Tennessee,
    to the Cincinnati Southern Railroad in Kentucky.

23. Survey with a view to placing locks and dams on the Cumberland River
    from Nashville, Tennessee, to the Cincinnati Southern Railroad in
    Kentucky.

27. Improvement of Tennessee River.

28. Improvement of Cumberland River, Tennessee and Kentucky.

29. Improvement of Hiwassee River, Tennessee.

30. Improvement of French Broad River, Tennessee.

31. Improvement of Clinch River, Tennessee.

32. Improvement of Duck River, Tennessee.

33. Improvement of Obey's River, Tennessee.

34. Improvement of Tennessee River.

35. Improvement of Cumberland River.

36. Improvement of Hiwassee River, Tennessee.

37. Improvement of French Broad River, Tennessee.

38. Improvement of Clinch River, Tennessee.

40. Improvement of Obey's River, Tennessee.

41. Improvement of Caney Fork River, Tennessee.

42. Improvement of Red River, Tennessee.

43. Examination of the Little Tennessee River, Tennessee.

44. Examination of Little Tennessee River from its mouth on the Holston or Big Tennessee River to the mouth of Tellico River.

45. Improvement of Tennessee River.

46. Improvement of Cumberland River.

47. Improvement of Hiwassee River, Tennessee.
King (W. R.)—Continued.

49. Improvement of Clinch River, Tennessee.

50. Improvement of Duck River, Tennessee.

51. Improvement of Obey’s River, Tennessee.

52. Improvement of Caney Fork River, Tennessee.

53. Improvement of Red River, Tennessee.

54. Examination of Holston River, Tennessee and Virginia.

55. Examination of Powell River, Virginia and Tennessee.

56. Examination for a canal to connect the waters of the Savannah River with those of the Hiwassee and Tennessee.

57. Examination of Red River from Port Royal, Montgomery County, Tennessee, to its mouth.

58. Examination of the South Fork of the Cumberland River, Kentucky.
   Also, H. Ex. Doc. No. 91, 46th Cong. 3d ses.

59. Improvement of Tennessee River.

60. Improvement of Cumberland River.

61. Improvement of Hiwassee River, Tennessee.

63. Improvement of Clinch River, Tennessee.

64. Improvement of Duck River, Tennessee.

65. Examination of Duck River from its mouth to Centreville, Tennessee.

66. Improvement of Obey’s River, Tennessee.

67. Improvement of Caney Fork River, Tennessee.

68. Improvement of Tennessee River.
King (W. R.)—Continued.

69. Improvement of Cumberland River.

70. Improvement of Hiwassee River.

71. Examination of Caney Fork and Obey's Rivers, Tennessee.

72. Improvement of Hiwassee River.

73. Improvement of Tennessee River.

74. Improvement of Hiwassee River.

75. Improvement of Tennessee River above Chattanooga.

76. Improvement of Tennessee River below Chattanooga.
   Chief of Eng. Kept., 1877, pp. 579-592, 1 map.

77. Improvement of Cumberland River.

78. Improvement of Hiwassee River.
   Chief of Eng. Rept., 1877, pp. 598-599.

79. Tennessee River, Chattanooga.

80. Tennessee River above Chattanooga.

81. Tennessee River below Chattanooga.
   Chief of Eng. Rept., 1876, pp. 712-713, 1 map.

82. Cumberland River.

Kingman (Dan C.).

1. Survey of the Tennessee River from Scott Point to Lock A, Muscle Shoals canal.
   Also with maps, H. Doc. No. 50, 57th Cong. 1st ses.

2. Improvement of Tennessee River.

3. Operating and care of Muscle Shoals canal, Tennessee River.

4. Improvement of French Broad River and Little Pigeon River, Tennessee.

5. Improvement of Clinch River, Tennessee and Virginia.

Kingman (Dan C.)—Continued.

7. Survey of Tennessee River at the "Suck," or mountain section, below Chattanooga, Tennessee, with a view to the establishment of slack-water navigation.
   Also, H. Doc. No. 461, 56th Cong. 1st ses.

8. Examination of Tennessee River at Moccasin Bend, below Chattanooga, Tennessee, with a view to the construction of a canal across said bend.
   Also, H. Doc. No. 188, 56th Cong. 1st ses.

   Also, H. Doc. No. 577, 56th Cong. 1st ses.

    Also, H. Doc. No. 616, 56th Cong. 1st ses.

M.

McAdoo (W. G.) and White (H. C.)
Elementary Geology of Tennessee.
pp. VI+118, Nashville, 1875.
Another edition, from same plates, with map, New York, 1881.

McCalley (H.).
Coal measures of plateau region, Geological Survey of Alabama.
1891, p. 18.

McCallie (S. W.).
1. The Ducktown copper mining district.
Eng. and Mg. Jour., vol. 74, pp. 439-441, 5 figs., 1902.
Contains notes on the geology of this area.

2. An erratic boulder from the coal measures of Tennessee.
Am. Geol., vol. 31, pp. 46-47, 1903.
Describes the occurrence of a bowler of rhyolite in a coal seam near Chattanooga, Tenn.

3. Remains of the mastodons recently found in Tennessee.
Science, vol. XX, p. 333, 1892.
Brief description of the portions discovered.

McCrea (A. S.) and D'Invilliers (E. V.).
1. Mineral resources of the upper Cumberland Valley of southeastern Kentucky and southwestern Virginia.
Louisville, 1902, 152 pp.

2. Comparison of some southern cookes and iron ores.

McCory (S. H.).
See Morgan (A. E.) and McCory (S. H.).

McDonald (Hunter).
Filtering galleries as applied to the water supply of Nashville.

McGee (W J)
1. The Appomattox formation on the Mississippi embayment.

2. The southern extension of the Appomattox formation.
McGee (W. J.)—Continued.
3. Map of the United exhibiting the present status of knowledge relating to the areal distribution of geologic groups (preliminary compilation), 17 1/4 by 28 inches.

4. The LaFayette formation.

5. The Columbia formation in the Mississippi embayment.

6. Remarks on the formations comprised under the term "Orange Sand," and on the relations of certain loams and gravels in the vicinity of Vicksburg and Grand Gulf.
   Discusses paper by T. C. Chamberlain on "Some additional evidence bearing on the interval between the Glacial epochs."

McFarland (Walter).
1. Examination of the Little Tennessee River from the Chilhowee Mountains to the Georgia line, in Macon County, North Carolina.

2. Examination of French Broad River from the Henderson County line to its junction with the Holston, Tennessee.

3. Examination of Powells, Clinch and Emory Rivers, in Virginia and Tennessee.

4. Improvement of Tennessee River.
   Chief of Eng. Rept., 1875, 786-790.

5. Improvement of the Cumberland River.

7. Examination of the Little Tennessee River above the mouth of the Holston River, to the Chilhowee Mountains.

8. Improvements of the Tennessee River.

9. Improvement of the Cumberland River.

10. Improvement of the Cumberland River, Tennessee.

11. Improvement of the Tennessee River.

12. Improvement and survey of the Tennessee River.
McFarland (Walter)—Continued.
13. Improvement and survey of Tennessee River from Knoxville to Kingston, Tennessee.

McLendon (W. E.) and Lyman (W. S.).
Soil survey of Grainger County, Tennessee.

McLendon (W. E.) and Zappone (C. R.) Jr.
Soil survey of Coffee County, Tennessee.
Field operations of the Bureau of Soils, U. S. Dept. of Agriculture, 1908.

McLendon (W. E.).
See Lyman (W. S.), Bennett (F.) and McLendon (W. E.).

McWhirter (A. J.).
   For the years 1883 and 1884, pp. 135, Nashville, 1885.
   Includes reports by Dr. James M. Safford and Charles L. Jungerman.
   pp. 903, Nashville, 1887.
3. Revised Handbook of Tennessee.
   pp. 200, 1 map, Nashville, 1885.

Macfarlane (Graham).
Notes on American cannel coal.

Macfarlane (James).
Coal regions of America, their topography, geology and development.
Includes map of Pennsylvania by J. P. Lesley, frontispiece.

Maclure (William).
1. Observations on the geology of the United States, etc., (explanatory of geological map.)
   Jour. de Physique, vol. 69, pp. 204-213; vol. 72, pp. 137-165, map, 1811.
2. Observations on the geology of the United States, etc., (with remarks on the probable effects of rock decomposition on nature and fertility of soils.)
   Published separately in 8o, Philadelphia, 1817.
   Map reproduced in 1822 by P. Cleveland, as frontispiece of An Elementary Treatise on Mineralogy and Geology, 2d edition, Boston, and by Charles Moxon in The Geologist for 1843, London.

Main (Josiah).
A manual for high schools, with special reference to Science and Agriculture.
Department of Agricultural Education, University of Tennessee.
Mallett (J. W.).
Analysis of Idocrase from Ducktown, Polk County, Tennessee.

Manning (P. H.).
The relations between geology and forests.
Tennessee Forest Association, 1902-03, p. 27.

Marcou (Jules).
1. Geological map of the United States and British provinces of North America (with explanatory text and geological sections; 92 pages, 8 plates). Boston, 1853.

2. Sur le gisement de l'or en Californie.
Bibliothe. Univ. de Geneve, 1855.
Geology of North America, etc., pp. 81-84, Zurich, 1858.

Petermann's Mitt., vol. 1, pp. 149-159, map, 4°, 1855.

Maury (D. H.).
New well and hydraulic pumping plant at Peoria, Ill.

Maxwell (Henry V.).
Tennessee iron ores.
Describes the occurrence, character, and geologic relations of iron-ore deposits in eastern Tennessee.

Malcolmson (C. T.).
See Holmes (J. A.).

Meadows (Thomas C.) and Brown (Lytle).
The phosphates of Tennessee.
Gives a historical sketch of phosphate mining and a map of the region.
Describes the occurrence of phosphatic material at various localities and the general geology of the district. Discusses the origin of the material.

Meehan (Thomas).
On the timber line of high mountains.
Gives Roane Mountain conditions.

Memminger (C. G.).
1. Commercial development of the Tennessee phosphate.
2. Progress in phosphate mining industry of the United States.
Mercer (Henry G.).
The finding of the remains of the fossils sloth at Big Bone Cave, Tennessee, in 1896.
   Rev. Amer. Geol., vol. 29, pp. 52-54, 1897.
   Describes the character of the remains and the strata in which they were found.

Merrill (George Perkins).
1. Stones for building and decoration.
   453 pp., New York, 1891.
   Describes the occurrence, chemical composition, and optical characters of the meteorite.

Miller (Arthur M.)
The association of the gasteropod genus Cyclora with phosphate of lime deposits.
   Describes the investigation as to the origin and nature of the Tennessee phosphate deposits, and gives chemical analyses of the Cyclora casts and of the rock in which they occur.

Miller (A. M.).
1. Improvement of South Forked Deer River, Tennessee.
2. Improvement of Big Hatchie River, Tennessee.
3. Improvement of South Forked Deer River, Tennessee.
4. Improvement of Big Hatchie River, Tennessee.

Miller (S. A.).

Miller (S. A.) and Gurley (Wm. F. E.).
1. New species of crinoids from Illinois and other States.
   Describes a new cystoid, caryocrinus milliganae from Tennessee.
2. Description of new and remarkable fossils from the palaeozoic rocks of the Mississippi valley.
   Ill. State Mus. Nat. Hist., Bull. 8, 65 pp. 5 pl. 8°, Springfield, Ill., 1895.
   Describes the following new species from Tennessee: Pisocrinus milligani, Thalanocrinus ovatus, T. cylindricus, Hadrophyllum tennesseense.
Miller (S. A.) and Gurley (Wm. F. E.)—Continued.

4. Description of new species of paleozoic echinodermata.
   III. State Mus. Nat. Hist., Bull. 6, 62 pp., 5 pl. 8°, Springfield, Ill., 1895.
   Describes following new species from Tennessee: Batocrinus honorabilis,
   B. wetherbyi, B. laterna, B. lacinosus, B. casualis, Actinocrinus botruo-
   sus, Agaricocrinus profundus, A. arcula, Platycrinus vascullum, Archae-
   ocrinus knoxensis.

5. New genera and species of Echinodermata.
   Describes following new species from Tennessee: Caryocrinus bulbulus,
   Aechaeocrinus peculiaris, A. asperatus, A. parvus, Mitrocrinus wetherbyi,
   Barycrinus expansus, Actinocrinus monticuliferous, Alloprocococrinus
   celsus.

6. Description of some new species of invertebrates from the paleozoic
   rocks of Illinois and adjacent States.
   Describes a new species of crinoid, Encalyptocrinus worthenii, from the
   Niagara of Wayne County, Tennessee.

7. New species of echinodermata and a new crustacean from the paleozoic
   rocks.
   Describes the following new species from Tennessee, Glyptaster milliganae,
   Encalyptocrinus milliganae.

8. New species of paleozoic invertebrates from Illinois and other States.
   Re-describes conularis gattingeri Safford.

   Neues Jahrbuch, 1860, 226-228.

Roessler (S. W.)
Preliminary examination of Wolf River, Tennessee.

Rogers (H. D.)
1. Sketch of the geology of the United States.

2. Address (on American geology, and present condition of geological research in the United States.)
   Read to Assoc. Am. Geol.
Rogers (H. D.)—Continued.

3. On Marcellus and Hamilton of the South and West.
   Read to Assoc. Am. Geol.

Rogers (H. D.) and Rogers (Wm. B.)

On the physical structure of the Appalachian chain, as exemplifying the laws which have regulated the elevation of great mountain chains generally.
   Reprint of reports on the Virginias, pp. 601-642, plates, New York, 1884.

Rogers (Wm. B.)

On the faunal relations of some of the geologic groups of the eastern United States.

Roosevelt (Theodore)

Message from the President of the United States, transmitting a report of the Secretary of Agriculture in relation to the forests, rivers and mountains of the southern Appalachian region.
   Sec. Ex. Doc. No. 84, 57th Cong. 1st ses., 210 pp., 800, plates, maps, 1902.

Rothmell (J. R.) and Eaton (E. M.) Committee.

The water supply of Chattanooga.
   Bull. State Bd. of Health (of Tenn.), vol. 1, No. 2, pp. 8-11.

Rothwell (Richard P.)

The mineral industry, its statistics, technology and trade.
   Vols. I to IX, 1892 to 1900.

Royce (Charles C.)

The Cherokee nation of Indians: A narrative of their official relations with the Colonial and Federal governments.
   Gives much Tennessee geographic data.

Ruhm (H. D.)

   Describes briefly the origin and distribution of the Tennessee phosphate deposits.

2. The present and future of the Mount Pleasant phosphate field.
   Describes, discovery, occurrence and production of phosphate rock in the Mount Pleasant phosphate field of Tennessee.

3. The Tennessee phosphate fields.

Safford (James M.)

1. The Silurian basin of Middle Tennessee, with notices of the strata surrounding it.
Safford (James M.)—Continued.

2. On the parallelism of the Lower Silurian groups of Middle Tennessee with those of New York.
   Annals of Science (Cleveland), vol. 1, pp. 249-251, 1853.

   11 pp., Nashville, 1857.

5. On Tennessee geological history.

6. On some points in American geological history.

7. The Upper Silurian beds of Western Tennessee; and Dr. F. Roemer's monograph.

8. On the Cretaceous and superior formations of Western Tennessee.

10. The topography and geology of Nashville.
    Report of the Board of Health of the City of Nashville, for 1877, pp. 147-151, Nashville, 1877.

11. Tennessee (geological formations.)

14. The water supply of Memphis.

15. The Tennessee coal measures.
    Describes the strata in which the coal measures occur and states that they form the uppermost beds of the Cumberland Plateau, covering an area of about 5,000 square miles.

16. Phosphate-bearing rocks in Middle Tennessee; preliminary notice.
    Describes the lithologic characters of the Devonian strata in which the phosphate occurs and the character of the phosphate material.

    Describes the occurrence of the phosphate material and the character of the Trenton formation in which it is found, and gives its chemical analysis.
Safford (James M.)—Continued.

   Describes the geologic relations of the various phosphate deposits.

19. Classification of the geological formations of Tennessee.
   Gives in tabular form a list of the geological formations of Tennessee and
   includes brief notes regarding them.

20. Note on the Middleton formation of Tennessee, Mississippi and Alabama.
   Describes the characters of the formations in these States, which form
   the lowest Eocene.

21. The pelvis of a Megalonyx and other bones from Big Bone Cave, Ten-
   nessee.
   Describes the pelvis and other bones found in this cave and its location
   and history.

22. Geology of Tennessee.
   550 pp., map, 4 pls., Nashville, 1889. Pages 1-124 had been issued in
   unbound form in 1861.

23. Statement made by the State Geologist to the thirty-fourth General As-
   sembly of Tennessee, of the adjourned session, 1866.
   Appendix to Senate Journal, Second Adjourned Session, 1866-67, pp. 33-
   39, Nashville, 1867.
   Relates to the publication of his final report.

24. (Suggestions for a state museum of economic geology.)
   Bien. Rept. Bureau of Agriculture, etc., for 1887-88, pp. 36-37, Nash-
   ville, 1889.

25. (Third.) Report of the State Geologist to the General Assembly of the
   State of Tennessee.
   November 8, 1869, pp. 8, Nashville, 1859.

26. Exhibition of certain bones of Megalonyx not before known.
   Also, Am. Geol., vol. 8, p. 193 and p. 222, 1891.

27. The Natural Divisions of Tennessee in their relation to disease.

28. Geological and Topographical features of Tennessee in relation to
disease.

29. The agricultural geology of the State of Tennessee.
   Bien. Rept. Commr. Agriculture, Statistics and Mines for 1883 and 1884,
   pp. 9-119, Nashville, 1885.

30. Report of Dr. J. M. Stafford, State Geologist, touching the work of the
    United States Coast and Geodetic Survey in Tennessee.
   Nashville, 1887.

   In Senate Journal of 46th General Assembly of State of Tennessee, pp.
   715-738, Nashville, 1889.
   Mainly devoted to the coal of Fentress and adjoining counties, but notes
   briefly some of the economic materials of several other counties.
BIBLIOGRAPHY OF TENNESSEE GEOLOGY.

   Mining Mag., vol. 1, p. 175, 1853. Note from the Louisville Courier.

Thompson (John).
Tabulated analyses of commercial fertilizers, from January 1st, 1909, to January 1st, 1910.

Trippel (A.) and Credner (H.)

Troost (Gerard).
1. On the Pentremites reinwardtii, a new fossil, with remarks on the genus Pentremites (Say), and its geognostic position in the States of Tennessee, Alabama and Kentucky.
2. On the localities in Tennessee in which bones of the gigantic mastodon and Megalonyx Jeffersonii are found.
3. On the organic remains which characterize the Transition series of the Valley of the Mississippi.
4. Third geological report of the State of Tennessee.
   32 pages, map, 12°, Nashville, 1835.
5. Fourth report of the geological survey of the State of Tennessee by the State Geologist.
   24 pages, map, 12°, Nashville, 1837.
6. Fifth geological report of the State of Tennessee.
7. Sixth report of the geological survey of Tennessee by the State Geologist.
   48 pages, map, Nashville, 1841.
   45 pages, map, Nashville, 1844.
**BIBLIOGRAPHY OF TENNESSEE GEOLOGY.**

**Troost** (Gerard)—Continued.

9. Eighth report of the geological survey of Tennessee by the State Geologist.  
20 pages, Nashville, 1845.  
Also in House Jour., 1845-46, App., pp. 65-76, Nashville, 1846.  

10. Ninth report of the geological survey of Tennessee by the State Geologist.  
30 pages, 2 plates, 12°, Nashville, 1848.  

11. Description d’un nouveau genre de fossiles.  
Soc. Geol. de France, Mem., Bd. 3, pt. 1, mem. 4, pp. 87-96, 1838.

12. Address delivered before the Legislature of Tennessee at Nashville, October 19, 1831.  
A plea for establishing a state geological survey.

16. Description of a mass of meteoric iron discovered near Murfreesboro, Rutherford County, Tennessee.  

17. Description of varieties of meteoric iron.  

18. Description of three varieties of meteoric iron: (1) from near Carthage, Smith County, Tennessee; (2) from Jackson County, Tennessee; (3) from near Smithland, Livingston County, Kentucky.  

19. (1) Description of a mass of meteoric iron which fell near Charlotte, Dickson County, Tennessee, in 1835; (2) of a mass of meteoric iron discovered in DeKalb County, Tennessee; (3) of a mass discovered in Green County, Tennessee; (4) of a mass discovered in Walker County, Alabama.  

20. Investigations respecting the extent of the coal formation of the State of Tennessee.  

21. Description and analysis of a meteoric mass found in Tennessee, composed of metallic iron, graphite, hydroxide of iron and pyrites.  

22. List of Tennessee crinoids.  
Troost (Gerard)—Continued.

23. Description d’un nouveau genre de fossiles.
Mem. de la Soc. Geol. de France Tome 3 Mem. No. 4, 1834, pp. 87-96, pls. 9-11.
Conotunularia n. gen.
C. Cuvierii pl. 9 f. 1. C. Brongniartii pl. 9 f. 2. C. Goldfussii pl. 9 f. 3.
Orthoceratites environs de Nashville.
The author describes a new species of Asaphus from Perry County, as A. megalophthalmus, p. 94, pl. 11, fig. 5, and an undescribed Trilobite pl. 11, fig. 6-7.
The first is a Phacops approaching P. Hudsoni Hall, the second a species of the genus Dalmanites.
The author does not give a name but figures pl. xi, fig. 4 and 8 an excellent figure of Brachiospongia digitata.
The author gives a Geol. Section from Memphis to French Broad River, pl. xi, f. 11 and 12.

(Unpublished, see Wood, Elriva. A critical summary of 1909.)

Tuomey (M.)
A brief notice of some facts connected with the Ducktown, Tenn., copper mines.

U.

Ulrich (Edward Oscar).
1. Portland cement resources of Tennessee.
Describes the occurrence, geologic relations, and character of limestone in Tennessee suitable for manufacture of Portland cement.

Ulrich (E. O.)
See Hayes (C. W.) and Ulrich (E. O.)
See Winchell (Newton H.) and Ulrich (E. O.)

U. S. Coast Survey.
Geographical positions determined approximately in West Virginia, Kentucky, Tennessee, Alabama, Mississippi and Missouri.
U. S. Coast Surv., Rept., 1865, App. 10, p. 137.

Usher. (F. C.)
On the elevation of the banks of the Mississippi.

Vanderford (Chas. F.)
The soils of Tennessee.

Van Hise (Charles Richard) and Leith (Charles Kenneth).
Pre-Cambrian geology of North Carolina.
For Tennessee see pp. 685-687.
BIBLIOGRAPHY OF TENNESSEE GEOLOGY.

Van Horn (F. B.)
The phosphate deposits of the United States.

Vodges (A. W.)
See Safford (J. M.) and Vodges (A. W.)

Walcott (Charles D.)
1. The Utica slate and related formations of the same geological horizon.
2. The Cambrian system in the United States and Canada.
3. (Remarks on the thickness and identity of the Calciferous formation from Canada to Tennessee.)
   In discussion of paper of E. Brainard and H. M. Seeley on "The Calciferous formations in the Champlain Valley."
4. The fauna of the Lower Cambrian or Olenellus zone.
5. Description of new forms of upper Cambrian fossils.
   Describes localities in the southern Appalachian region in which Cambrian fossils have been found and compares the strata with those at different points in the northern United States and in Canada.
7. Paleozoic intraformational conglomerates.
   Gives a definition of the term intraformational conglomerate and describes localities in Canada, Vermont, New York, Pennsylvania, and Tennessee where they occur, and discusses their origin.

Walker (J. S.)
The source of Nashville's water supply.

Watson (Thomas Leonard)
1. Lead and zinc deposits of the Virginia-Tennessee region.
   Describes the general geology of the region, the distribution of the ore deposits, and the alteration, mode of occurrence, and the origin of the ores. Adds a bibliography.
Watson (Thomas Leonard)—Continued.

2. Fluorite and barite in Tennessee.
   A brief note in regard to the occurrence of fluorite and barite in Tennessee.

Weed (Walter Harvey).

1. Copper mines of the world.
   New York, 1907, pp. 348-357.

2. The copper mines of the United States in 1905.
   Describes the general condition of the copper industry in the United States, and the geology, character, occurrence, and other features of the copper ores of the several states.

3. The copper deposits of the Eastern United States.
   Describes the occurrence and character of copper-ore deposits of the Appalachian region, particularly those of Virginia and Tennessee.

4. Copper deposits of the Appalachian States.
   Describes the occurrence of deposits of copper ores in New Jersey, Maryland, Virginia, North Carolina, and Tennessee.

5. Types of copper deposits in the Southern United States.
   Describes the character and occurrence of copper ores in certain districts and discusses relations of the ores of the regions with these type deposits.

Weeks (Joseph D.)

Manganese.
   Includes a brief discussion of the origin and occurrence of manganese and notes on its occurrence in Alabama, Arkansas, California, Colorado, Georgia, Indian Territory, New Jersey, Pennsylvania, Tennessee, Vermont, Virginia, New Brunswick, Nova Scotia and Cuba.

Weitze! (G.)

1. Improvement of the Tennessee River.

2. Improvement of the Tennessee River.

3. Improvement of the Tennessee River.

6. Survey and improvement of Cumberland River.

7. Survey of the Upper Cumberland River.

8. Improvement of Cumberland River below Nashville, Tenn.
BIBLIOGRAPHY OF TENNESSEE GEOLOGY.

Whitney (J. D.)
2. Remarks on the changes which take place in the structure and composition of mineral veins near the surface, with particular reference to the East Tennessee copper mines. Mining Mag., vol. 5, pp. 24-28, 1855.

Whitney (J. D.) and Wadsworth (M. E.)

Whittlesay (Chas.)

Wilder (H. J.) and Geib (W. J.)
Wilder (J. T.)

(A general outline of the mineral resources of Eastern Tennessee.)

Introduction to the resources of Tennessee by J. B. Killebrew, pp. 230-233, Nashville, 1874.

Wilks (John).

Some Tennessee water powers.

Willard (J. H.)

1. Improvement of Big Hatchie River, Tennessee.

2. Improvement of Forked Deer River, Tennessee.

3. Improvement of Forked Deer River, Tennessee.

4. Improvement of Big Hatchie River, Tennessee.

5. Improvement of Forked Deer River, Tennessee.

6. Improvement of Big Hatchie River, Tennessee.

7. Improvement of Forked Deer River, Tennessee.

8. Improvement of Big Hatchie River, Tennessee.

9. Improvement of Big Hatchie River, Tennessee.

10. Improvement of South Forked Deer River, Tennessee.

Wilcox (Joseph).

Mountain drainage of Eastern Tennessee and Western North Carolina.

Williams (H. S.)

Correlation papers; Devonian and Carboniferous.

Williams (Albert, Jr.)

1. U. S. Geol. Survey, mineral resources of the United States for 1833, gives figures of production, short descriptive notes, etc.

2. Same, for 1884.

3. Same, for 1885.

Willis (Bailey).

1. Notes on the samples of iron ore collected in East Tennessee.
Willis (Bailey)—Continued.
2. Round about Asheville.
3. Notes on the samples of iron ore collected in East Tennessee.

Wilson (E. H.)
Report upon the results of boring at Memphis, Tenn., Helena, Ark., Arkansas City, Ark., Greenville, Miss., and Lake Providence, La., with data pertaining to similar work previously executed.

Winchell (Alexander).
2. Notes and descriptions of fossils from the Marshall groups of the Western States, with notes on fossils from other formations.
3. Notes on fossils from Tennessee, collected from the strata immediately overlying the black shale, and transmitted for examination by J. M. Safford.
   Geology of Tennessee, Safford, pp. 440-446, Nashville, 1869.
4. The sanitary geology of Nashville.
   Third Rept. Board of Health of Nashville, pp. 135-150, Nashville, 1879.

Winchell (Newton H.)
Chart of geological nomenclature intended to express the relation of Minnesota to the great geological series of the earth, and the probable equivalency of some of the names the formation has received in the various States and in Europe.

Winchell (N. H.) and Ulrich (E. O.)
The Lower Silurian deposits of the Upper Mississippi.
Discusses the evidence for the correlation of the various subdivisions of the Lower Silurian group in the areas named.
Gives a list of fossils from different horizons in the several areas.

Wood (A. H.)
Sixth annual report of the Bureau of Labor, Statistics and Mines.
pp. 318, 8 maps, Nashville, 1897.

Wood (Elvira).
A critical summary of Troost's unpublished manuscript on the crinoids of Tennessee.
Wood (B. H.)
See Hoyt (John C.) and Wood (B. H.)

Woodbridge (W. C.)
Description des monts Apalaches.

Worthen (A. H.)
Remarks on the relative age of the Niagara and the so-called Lower Helderberg groups.

Wright (Daniel F.)
Deals with the Roane Mountain region.

Wrigley (Henry E.)
The geography of petroleum, geology of petroleum.

Z.

Zon (Raphael).
Management of second growth in the Southern Appalachians.

Zappone (C. R., Jr.)
See McLendon (W. E.) and Zappone (C. R., Jr.)

Tenn., Wilder and Geb.
Standingstone folio, Campbell, 1.
Terrestrial magnetism, Faris, 1.
The town of Cardiff—and lands and
mines of the Cardiff Coal and Iron
Company, Smalley.
Wartburg folio, Kelth, 4.

Cumberland Plateau.

Facts about the Cumberland table
land of Tennessee, Killebrew, 14.

Cumberland River.

Cumberland River, King, 82.
Examination of the South Fork of
Cumberland River, King, 58.
Improvement of Cumberland River,
Kingman, 25; Adams, 3, 6, 8 and
11; Barden, 1; King, 10, 13, 28, 35,

Cumberland River—Continued.

46, 60, 69, 74 and 77; Barlow, 6, 12,
13, 19, 20, 27, 28, 41, 42, 46 and 53;
McFarland (Walter), 5, 9 and 10;
Biddle, 2, 8, 11, 18 and 24; Harts,
12, 20 and 28; Newcomer, 6 and 13;
Robert (Henry M.), 10 and 12;
Sears, 3; Weltzel, 8.
Operating and care of locks and dams
on Cumberland River, Newcomer,
5; Harts, 10, 19 and 27.
Preliminary examination of Lower
Cumberland River, Barlow, 11.
Profiles of rivers (in Tennessee),
Gannett, 6.
Report in reference to preliminary
examination, King, 22.
Survey and improvements of Cumber-
land River, Weltzel, 6.
Survey of the Upper Cumberland
River, Weltzel, 7.
Survey with a view to placing locks
and dams on the Cumberland River,
King, 23.

D

Davidson County.

An account of the geology of Harp-
eth Ridge, Loomis.
An inquiry into the present quality
of the public water supply of Nash-
ville, Brown (L. P.), 5.
Columbia folio, Hayes and Ulrich.
Geology of Nashville and immediate
vicinity, Jones.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Ten-
nesse, Killebrew and Safford, 2.
Letters from the East and from the
West, Hall (Frederick).
Oil and gas developments in Ten-
nesse, Munn.
Report on chemical analysis of Da-
v idson County water, Day (Wm.
C.), 2.
Soil survey of Davidson County,
Tenn., Smith and Bennett.
Source of contamination of Nashville
drinking water, Day (Wm. C.), 1.
Terrestrial magnetism, Faris, 1;
Bauer, 2.
The more common minerals about
Nashville, Glenn, 3.
The source of Nashville's water sup-
ply, Walker.
Topography and geology of Nashville,
Safford, 10.
Topographical map of Nashville and
vicinity, Foster (W. W.).
BIBLIOGRAPHY OF TENNESSEE GEOLOGY.

Decatur County.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Tennessee white phosphates, Hayes, 2.
Terrestrial magnetism, Faris, 3.
White phosphates of Decatur County, Tenn., Eckel, 1 and 2.

DeKalb County.
Description of a mass of meteoric iron, which fell near Charlotte, Dickson County, Tenn., Troost, 19.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
McMinville folio, Hayes, 16.
Notes on a new meteorite from Hendersonville, N. C., and additional pieces of the Smithville, Tenn., fall, Glenn, 2.
Smithville meteoric iron, Huntingdon, 1.

Dickson County.
Columbia folio, Hayes and Ulrich.
Description of a mass of meteoric iron, which fell near Charlotte, Dickson County, Tenn., Troost, 19.
Geology of Tennessee, Safford, 22.
Oil and gas developments in Tennessee, Munn.
Terrestrial magnetism, Bauer, 2.

Drainage.
Alluvial lands of the lower Mississippi Valley and their drainage, Morgan (A. E.).
Destructive floods in the United States, in 1904, Murphy.
Drainage of the river bottoms and swamp lands of West Tennessee, Cooper.
Drainage problems of Tennessee, Ashley, 8.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Mountain drainage of eastern Tennessee and western North Carolina, Wilcox.
Preliminary report upon the drainage of the lands overflowed, Morgan and McCrory.
Report upon the physics and hydraulics of the Mississippi River, etc., Abbott and Humphreys.

Duck River.
Examination of Duck River from its mouth to Centerville, King, 65.
Improvement of Duck River, King, 6, 17, 32, 39, 50 and 64; Barlow, 29, 40 and 49.

Dyer County.
Clays of West Tennessee, Nelson.
Drainage of the river bottoms and swamp lands of West Tennessee, Cooper.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Terrestrial magnetism, Faris, 1.
The upland geological formations of Obion, Dyer, etc., Safford, 53.
Underground water, Glenn, 6.

Dynamic Geology.
Central basin of Tennessee, Kennedy.
Cretaceous and Tertiary Peneplains of eastern Tennessee, Dodge.
Decay of rocks geologically considered, Hunt, 4.
Erosion at Ducktown, Tennessee, Glenn, 7.
Formation of natural bridges, Cleland.
Fossiliferous sandstone dikes in Eocene, Glenn, 2 and 6.
Geologic dates of origin of certain topographic forms, Davis, 2.
On the elevation of the banks of the Mississippi, Usher.
On the geognosy of the Appalachian system, Hunt, 5.
Origin of cross valleys, Davis, 1.
Overthrust faults of the southern Appalachians, Hayes, 1.

Earthquake.
A second visit to North America, Lyell.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
New Madrid earthquake, Shepard (E. M.).

East Tennessee.
A brief historical, descriptive and statistical review of East Tennessee, Smith (J. Gray).
A general outline of the mineral resources of eastern Tennessee, Wilder (J. T.).
East Tennessee—Continued.

An essay on the medical topography of East Tennessee, Ramsey.

East Tennessee copper mines, Gilbert.

Extent and value of East Tennessee minerals, Cowlam.

Geology of Tennessee, Safford, 22.

Geological and mineralogical account of the mining district in the states of Georgia — — —, and East Tennessee, Peck.

Geological notes in western Virginia, North Carolina and eastern Tennessee, Britton.

Introduction to the Resources of Tennessee, Killebrew and Safford, 2.

Mineral and agricultural resources of the portion of Tennessee along the Cincinnati Southern railroad, Killebrew, 3.

Mineral resources along the line of the East Tennessee-Virginia and Georgia division of the So. Ry., Brewer (Wm. M.), 2.

Notes on the samples of iron ore collected in East Tennessee, Willis, 1 and 3.

Recent zinc mining in East Tennessee, Keith, 10.

Remarks on the mineralogy and geology of the northwestern part of the State of Virginia and eastern part of Tennessee, Kain.

Remarks on the changes which take place in the structure and composition of mineral veins, Whitney, 1.

Report of the geology of northeastern Alabama and adjacent portions of Georgia and Tennessee, Hayes, 3.

Some drift hematite deposits in East Tennessee, Nichols.

Southern red hematite as an ingredient of metallic paint, Burchard, 1.

Southern magnetite and magnetic separation, Chase.

Tennessee iron ores, Maxwell.

Tennessee marbles, Keith, 15.

The Cretaceous and Tertiary peneplains of eastern Tennessee, Dodge.

The medical topography of the valley of East Tennessee, Boyd (S. B.).

East Tennessee—Continued.

The mineral and agricultural resources of East Tennessee, Knoxville Board of Trade.

Zinc deposits of Tennessee, Gordon, 3.

Zinc in East Tennessee, Clarke (W. C.), 2.

Economic Geology.

Economic geology of the Bristol and Big Stone Gap section of Tennessee and Virginia, Boyd (C. R.), 2.

Geology of Tennessee, Safford, 22.

Introduction to the Resources of Tennessee, Killebrew and Safford, 2.

Resources of Tennessee, Anon., 1.

Elk River.

Final report upon survey of Elk River, Kingman, 16.

Improvement of Elk River, Kingman, 6 and 21; Knight, 11.

Preliminary examination of Elk River, Newcomer, 16; King, 3.

Survey of Elk River, Kingman, 22.

Emory River.

Examination of Powell's, Clinch and Emory rivers, McFarland (Walter), 3.

Preliminary examination of Emory River, Robert (Henry M.), 3.

Survey of Emory River, Kingman, 30.

Fayette County.

Geology of Tennessee, Safford, 22.

Introduction to the Resources of Tennessee, Killebrew and Safford, 2.

Terrestrial magnetism, Faris, 1.

The Middleton formation of Tennessee, Safford, 32.

Fentress County.

Fentress County, Tennessee, coal and timber, Clarke (Jas. N.).

Geology of Tennessee, Safford, 22.

Introduction to the Resources of Tennessee, Killebrew and Safford, 2.

Oil and gas developments of Tennessee, Munn.

Standingstone folio, Campbell, 1.

Terrestrial magnetism, Bauer, 1.

Wartburg folio, Keith, 4.

Fertilizer.

Geology of Tennessee, Safford, 22.

Introduction to the Resources of Tennessee, Killebrew and Safford, 2.

See Phosphate.
Flint.
Geology of Tennessee, Safford, 22.

Fluorite.
Fluorite and barite in Tennessee, Watson, 2.
Fluorspar in Tennessee, Hayden.
Statistical reports, Shiflett, 1, 2, 3, 4, 5, 6, 7, 8 and 9.
The Nashville Division, Southern Railway, 4.

Forests.
A brief description of the forests of Tennessee, Anon., 6.
Chestnut oak in the southern Appalachians, Foster and Ashe.
Conservative lumbering at Sewanee, Tenn., Foley, 1.
Forest conditions and possibilities in Tennessee, Ramage.
Forests and forest conditions in the southern Appalachians, Ayres and Ashe, 2.
Forests of Tennessee, their extent, character and distribution, Sudworth and Killebrew.
Forestry and stream flow, Harts, 1.
Geology of Tennessee, Safford, 22.
Hardwood bottom lands in two southern states, Anon., 5.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Management of second growth in the southern Appalachians, Zon.
Message from the President of the United States, Roosevelt.
Necessity of preserving the forests of Monteagle, Sumney.
Necessity of preserving the forests of Tennessee, and legislation necessary for that purpose, Killebrew, 12.
On the timber line of high mountains, Meehan.
Preservation of the Appalachian forests in a national park, Battle (R. H.).
President's opening address, Killebrew, 11.
Relation between geology and forests, Manning.
Relation of forests to manufacturing industries of Tennessee, Powell, 1.
Relation between geology of Tennessee to manufacturing industry of the state, Powell, 2.
Resources of Tennessee, Anon., 1.
Some native trees for parks and yards, Hinds, 1.
State forestry association for Tennessee (organization), Anon., 2.

Forests—Continued.
Sylviculture in relation to city streets, parks and private grounds, Kelley.
Tennessee forests, Anon., 3.
The southern Appalachian forests, Ayres and Ashe, 1.
The influence of forests on streams, Glenn, 11.
Timber in Tennessee, Killebrew and Safford, 1.
Waning hardwood supply and the Appalachian forests, Hall (Wm. L.). What can the state do in the matter of, forestry, Anon., 4.
White oak in the southern Appalachians, Gleely and Ashe.
Working plan for southern hardwoods and its results, Foley, 2.

Forked Deer River.
Examination of Forked Deer River, Suter.
Examination of North Fork of Forked Deer River, Benyaurd, 4.
Examination of South Fork of Forked Deer River, Benyaurd, 5.
Improvement of Forked Deer River, Newcomer, 7 and 14; Willard, 2, 3, 5, 7 and 10; Adams, 2, 5, 7 and 10; Biddle, 1, 7 and 10; Kingman, 24.
Improvement of South Fork of Forked Deer River, Bergland, 1 and 3; Miller (A. M.), 1 and 3.
Improvement of Obion and Forked Deer Rivers, Barden, 2; Harts, 13, 21 and 29; Sears, 4.
Preliminary examination of Obion and Forked Deer Rivers, Sears, 1.
Preliminary examination of North Fork of Forked Deer River, Willard, 11.
Survey of North Fork Deer River, Bidue, 3.
Survey of Forked Deer River, Bidule, 5.

Franklin County.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Oil and gas developments of Tennessee, Munn.
Sewanee folio, Hayes, 10.
Stevenson folio, Hayes, 13.
The topography, geology and water supply of Sewanee, Safford, 49.

French Broad River.
Examination of French Broad River from the Henderson County line, McFarland (Walter), 2.
French Broad River—Continued.
Geology and mineral resources of part of the Cumberland Gap coal field, Ashley and Glenn.
Improvement of French Broad River, Bariow, 3, 16, 23, 33, 36 and 51; King, 8, 15, 30, 37, 48 and 62; Robert (Henry M.), 9.
Improvement of French Broad and Little Pigeon rivers, Barden, 4; Kingman, 4, 19, 23, 32 and 36; Knight, 4 and 12; Biddle, 16 and 25; Harts, 4, 7, 15 and 23.
Improvement of French Broad River and Little Tennessee River, Bingham, 2.
Profiles of rivers (in Tennessee), Gannett, 6.
Survey of French Broad River, Kingman, 11; Weitzel, 5.

General Geology—Continued.
Geology, mineralogy, scenery, etc., of parts of Virginia, Tennessee, Cornelius.
Geology of New York, part 4 (fourth or western district), Hall, (J), 2.
Geological and mineralogical account of the mining districts in the State of Georgia —— and East Tennessee, Peck.
Geological chart of the United States, east of the Rocky Mountains and of Canada, Bradley, 2.
Geological (features), Haywood.
Geological map of the United States and part of Canada, Hitchcock.
Geological map of the United States, Hitchcock and Blake.
Geological map of the United States and British provinces of North America, Marcou, 1.
Geological reconnaissance of Tennessee, 1st biennial report, Safford, 3.
Letter on geology, being a series of communications originally addressed to Dr. John Locke, of Cincinnati, Christy.
Manual for the high schools with special reference to science and agriculture, Main.

Map of the United States, exhibiting the present status of knowledge relating to the areal distribution of geologic groups, Mcgee, 3.
Notes explanatory of a section from Cleveland, Ohio, to the Mississippi River, in a southwest direction, with remarks upon the identity of the western formation with those of New York, Hall (J.), 3.
Notes upon the geology of the western States, Hall (J,), 1.
Observations on the geology of the United States, etc., Maclure, 2 and 1.
On a geological chart of the United States east of the Rocky Mountains and of Canada, Bradley, 3.
On the geology, mineralogy, scenery and curiosities, Cornelius.
On the parallelism of the Paleozoic deposits of North America, with those of Europe, etc., Hall (J.), 4.
On some points in American geology, Hunt, 3.
Remarks on the mineralogy and geology of the northwestern part of the State of Virginia, Kain.
General Geology—Continued.

Report of a geological examination made on certain lands and mines, Owen (Richard).

Report of the State Geologist, Safford, 36.

Second biennial report on geology of Tennessee, Safford, 4.

Sketch of the geology of Tennessee, with description of its minerals and ores, Currey, 1.

Sketch of the geology of the United States, Rogers, (H. D.), 1.

Soil and geological map of Tennessee, Nashville, Chattanooga & St. Louis Railway.

Sur le gisement de l’or en Californie, Marcou, 2.

Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Lead and zinc deposits of the Virginia-Tennessee region, Watson, 1.
Maynardville folio, Keith, 16.
Morristown folio, Keith, 17.
Terrestrial magnetism. Bauer, 1.
Zinc mining in Tennessee, Osgood.

JOHNSON COUNTY.
Cranberry folio, Keith, 13.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Terrestrial magnetism, Bauer, 1.

K.

KNOX COUNTY.
Briceville folio, Keith, 7.
Building stone, Merrill, 1.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Knoxville folio, Keith, 5.
Lead and zinc deposits of the Virginia-Tennessee region, Watson, 1.
Loudon folio, Keith, 6.
Maynardville folio, Keith, 16.
Tennessee marbles, Keith, 15.
Terrestrial magnetism, Faris, 1; Bauer, 1.

KRAURITE.
Kraurite and Cacozone in Tennessee, Troost, 15.

L.

LAUDERDALE COUNTY.
Clays of West Tennessee, Nelson.
Drainage of the river bottoms and swamp lands of West Tennessee, Cooper.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Terrestrial magnetism, Faris, 2.
The upland geological formations of Obion, Dywr, Lauderdale—Safford, 53.
Underground waters, Glenn, 6.

LAWRENCE COUNTY.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Oil and gas developments in Tennessee, Munn.
Silurian and Devonian limestones of western Tennessee, Foerste, 4.
Soil survey of Lawrence County, Tenn., Mooney and Ayrs, 2.
Western iron belt of Tennessee, Killebrew, 8.

LEAD.
Briceville folio, Keith, 7.
Cleveland folio, Hayes, 14.
Cranberry folio, Keith, 13.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Lead and zinc deposits of Virginia-Tennessee region, Watson, 1.
Maynardville folio, Keith, 16.
Mineral resources along the line of the East Tennessee, Virginia and Georgia division of Southern Railway, Brewer (Wm. M.), 2.
Morristown folio, Keith, 17.
Southern Railway territory, Southern Railway, 1.
Statistical reports, Shiflet, 1, 2, 3, 4, 5, 6, 7, 8 and 9.
The Nashville division, Southern Railway, 4.

L.EWIS COUNTY.
Columbia folio, Hayes and Ulrich.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Silurian and Devonian limestones of western Tennessee, Foerste, 4.
Tennesee phosphates, Hayes 12 and 17.
Terrestrial magnetism, Faris, 1.

LIGNITE.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
The lignitic stage, Harris, 2.

Marble—Continued.

Morristown folio, Keith, 17.
Southern Railway territory, Southern Railway, 1.
Statistical reports, Shiflett, 1, 2, 3, 4, 5, 6, 7, 8 and 9.
Tennessee marble industry, Southern Railway, 5.
Tennessee marbles, Keith, 15.
Tennessee marble as a building stone, Ferris (Chas.).
Tennessee marble, Merrill, 1.
The Nashville division, Southern Railway, 4.
Third annual report, Lloyd, 1.

Marion County.

Chattanooga folio, Hayes, 9.
Cost of pig iron in Sequatchie Valley, Bowron, 1.
General description of ores used in the Chattanooga district, Fleming.
Geology and mineral resources of Sequatchie Valley, Bowron, 3.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Iron ores of the Chattanooga district, Bowron, 2.
Ringgold folio, Hayes, 7.
Sequatchie folio, Hayes, 10.
Stevenson folio, Hayes, 13.
Terrestrial magnetism, Bauer, 1.

Marshall County.

Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Oil and gas developments in Tennessee, Munn.

Maury County.

A brief reconnaissance of the Tennessee phosphate fields, Hayes, 20.
Columbia folio, Hayes and Ulrich.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Oil and gas developments in Tennessee, Munn.
Phosphate deposits in Maury County, Tennessee, Killebrew, 9.
Phosphate rock deposits of Tennessee during 1897, etc., Brown (L. P.), 1, etc.
Present and future of the Mt. Pleasant field, Ruhm, 2.
Tennessee phosphates, Hayes, 12 and 17.
Terrestrial magnetism, Faris, 1.

McMinn County.

Cleveland folio, Hayes, 14.
Fluorite and barite in Tennessee, Watson, 2.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Tennessee marbles, Keith, 15.
Terrestrial magnetism, Bauer, 1.

McNairy County.

Clays of, Crider; Eckel, 3; Nelson.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Terrestrial magnetism, Faris, 3.
Underground water resources, Glenn, 6.

Meigs County.

Chattanooga folio, Hayes, 9.
Cleveland folio, Hayes, 14.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Kingston folio, Hayes, 8.
Terrestrial magnetism, Bauer, 1.

Meridian Lines.

Terrestrial magnetism, Faris, 1, 2 and 3; Bauer, 1 and 2.

Meteorites.

A new meteorite from Hamblen County, Tennessee, Eakins.
Analysis of the Drabis Creek, Tennessee, meteorite, Seybert.
Analysis of the meteoric iron from Cocke County, Shepard (C. U.), 1.
Brief description of the Drabis Creek, Tennessee, meteorite, Silliman, 2.
Catalogue of all recorded meteorites, Huntingdon, 2.
Description and analysis of a meteoric mass, Troost, 21.
Description of a mass of meteoric iron, Troost, 19.
Description of a mass of meteoric iron discovered near Murfreesboro, Troost, 16.
Description of three varieties of meteoric iron, Troost, 18.
Description of varieties of meteoric iron, Troost, 17.
Descriptive catalogue of the meteorite collection in the United States, Tassin.
Geology of Tennessee, Safford, 22.
Meteorelsen-Studen, Cohn.
Notes on a new meteorite from Hendersonville, N. C., and additional pieces of the Smithville, Tenn., fall, Glenn, 1.
Meteorites—Continued.

Notice of the circumstances attending the fall of the Tennessee meteorites, Silliman, 1.

On comparison and structure of the Hamblen County, Tennessee, meteorite, Merrill, 2.

Smithville meteorite, Huntingdon, 1.

Mica.

Cranberry folio, Keith, 13.

Middle Tennessee.

General topography of Middle Tennessee, Safford, 41.

Geology of Tennessee, Safford, 22.

Information for immigrants concerning Middle Tennessee, Killebrew 13.

Introduction to the Resources of Tennessee, Killebrew and Safford, 2.

Letters from the east and from the west, Hall (Frederick).

Remarks on the genus Tetradium with notice of the species found in Middle Tennessee, Safford, 38.

Silurian and Devonian limestones of western Tennessee, Foerste, 4.

Silurian basin of Middle Tennessee, with notices of the strata surrounding it, Safford, 1.

The economic and agricultural geology of the State of Tennessee, Safford, 47.

The sanitary geology of Nashville, Winchell (A.), 4.

Millstone.

Geology of Tennessee, Safford, 22.

Introduction to the Resources of Tennessee, Killebrew and Safford, 2.

Mineral Paints.

Resources of East Tennessee, Southern Railway, 2.

Southern red hematite as an ingredient of metallic paint, Burchard, 1.

Statistical reports, Shiflett, 4, 5, 6, 7, 8 and 9.

Mineral Resources.

Cumberland Gap coal field, Ashley, 2 and 3.

Descriptive report of various tracts of mineral lands, Anon., 7.

Distribution of titanic oxide upon the surface of the earth, Dunnington.

General outline of the mineral resources of eastern Tennessee, Wilder.

Mineral Resources—Continued.

Geology and mineral resources of Sequatchie Valley, Tennessee, Brown, 3.

Geology of Tennessee, Safford, 22.

Geological and mineralogical account of the mining districts, Peck.

Introduction to the Resources of Tennessee, Killebrew and Safford, 2.

Letters from the east and from the west, Hall (Frederick).

Mineral and agricultural resources of the portion of Tennessee along the Cincinnati Southern Railway, Killebrew, 3.

Mineral deposits and mining interests along the line of the Nashville, Chattanooga & St. Louis Railway, Killebrew, 19.

Mineral products of Tennessee, Gordon, 2.

Mineral resources of the Brushy Moutain coal field, Bryant.

Mineral resources of upper East Tennessee, Imoden.

Mineral Resources of Tennessee, Proctor (R. D.).

Mineral tract of the East Tennessee and Cherokee Copper Mining Company, Whitney, 3.

More common minerals of the region about Nashville, Glenn, 3.

On the geology, mineralogy, scenery and curiosities of parts of Virginia, Tennessee, Cornelius.

Outline introduction to the mineral resources of Tennessee, Ashley, 5.

Remarks on the changes which take place in the structure and composition of mineral veins near the surface, Whitney, 1.

Remarks on the mineralogy and geology of the northwestern part of the State of Virginia and eastern part of the State of Tennessee, Kain.

Remarkable mineral properties, Koenig, 1.

Report of the department of geology, minerals, mines and mining, Safford, 42.

Report of committee on mineral products, Cook.

Second annual report of the Commissioner of Labor and Inspector of Mines, Ford, 1.

Special report of the Commissioner of Labor and Inspector of Mines, Ford, 2.
BIBLIOGRAPHY OF TENNESSEE GEOLOGY.

MINERAL RESOURCES—Continued.
Statistical reports, Shiflett, 1, 2, 3, 4, 5, 6, 7, 8 and 9.
Tennessee, Killebrew, 6.
The mineral and agricultural resources of East Tennessee, Knoxville Board of Trade.
The mineral industry, Rathwell and Struthers.
The mineral resources of the South, Safford, 48.
The resources of the valley of the Cumberland River, Safford, 44.
View of the Valley of the Mississippi, R. B.
(See also under the head of the several minerals.)

MINERAL WATERS.
An annotated catalogue of the mineral springs and wells of Tennessee, Safford, 34.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Mineral waters of the United States, Crook.
Monteagle spring, Hinds, 2.
Regions of west Tennessee of sulphur waters and chalybeate waters, Safford, 52.
The mineral springs of Tennessee, Lindley, 2.

MONROE COUNTY.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Loudon folio, Keith, 6.
Tennessee marbles, Keith, 15.
Terrestrial magnetism, Bauer, 1.

MONTGOMERY COUNTY.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Portland-cement of resources of Tennessee, Ulrich, 1.
Soil survey of Montgomery County, Tennessee, Lapham and Miller.
Terrestrial magnetism, Faris, 3.

MOORE COUNTY.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.

MORGAN COUNTY.
Bricsville folio, Keith, 7.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.

MORGAN COUNTY—Continued.
nessee, Killebrew and Safford, 2.
Kingston folio, Hayes, 8.
Mineral resources of Brushy Mountain coal field, Bryant.
Oil and gas developments in Tennessee, Munn.
Southern Appalachian coal field, Hayes, 23.
Terrestrial magnetism, Bauer, 1.
The town of Cardiff and lands and mines of the Cardiff Coal and Iron Company, Smalley.
Wartburg folio, Keith, 4.

N.

NATURAL GAS.
Oil and gas developments in Tennessee, Munn.
Statistical reports, Shiflett, 4, 5, 6, 7, 8 and 9.
The topography and geology of Middle Tennessee as to natural gas, Safford, 37.

NAVIGATION.
Erosion in Appalachians, Glenn, 12.
Final report upon survey of Elk River, Tennessee, Kingman, 16.
Relation of the southern Appalachian mountains to inland water navigation, Leighton and Horton.
Report of examinations and surveys (made in 1830) with a view of improving the navigation of the Holston and Tennessee Rivers, Long.
Slack water navigation and public health, Safford, 32.
Survey of North Forked Deer River, Tennessee, Biddle, 3.
Survey of Forked Deer River from Dyersburg, Biddle, 5.
(See under River Improvement.)

NICKEL.
Asheville folio, Keith, 11.

NOLICHUCKY RIVER.
Profiles of rivers (In Tennessee), Gannett, 6.

O.

OBEY'S RIVER.
Examination of Caney Fork and Obeys's River, King, 71.
Improvement of Obey's River, King, 18, 33, 40, 51 and 66.
Preliminary examination of Obell's (Obeys's) River, Barlow, 25.
Obion County.

A second visit to North America, (on earthquakes), Lyell.
Clays of West Tennessee, Nelson.
Drainage of river bottoms and swamp lands of West Tennessee, Cooper.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Terrestrial magnetism, Faris, 3.
The upland geological formations of Obion, Safford, 53.
Underground water resources, Glenn, 6.

Obion River.

Drainage of the river bottoms and swamp lands of West Tennessee, Cooper.
Drainage problems in Tennessee, Ashley, 6.
Examination of Obion River, Benyard, 3.
Improvement of Obion River, Adams, 1, 4, 7 and 9; Biddle, 4; 6, 9, 13 and 22; Kingman, 23.
Improvement of Obion and Forked Deer Rivers, Barden, 2; Harts, 13, 21 and 29; Newcomer, 7 and 14; Sears, 4.
Preliminary examination of Obion and Forked Deer Rivers, Sears, 1.
Preliminary examination of Obion River, Barlow, 9.
Survey of North Forked Deer River from Dyersburg to main stream, and thence to Obion River, Biddle, 3.
Survey of North Forked Deer River from Dyersburg, Tennessee, to its junction with the Obion River, Biddle, 5.
Underground water resources, Glenn, 6.

Oil and Gas.

Cumberland Gap coal field, Ashley 2 and 3.
Geography of petroleum, geology of petroleum, Wrigley.
Geology and mineral resources of part of Cumberland Gap, Ashley and Glenn.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Mineral Oil, Newberry.

Oil and Gas—Continued.

Mineral resources of the United State Williams (Albert, Jr.), 1, 2 and 3; Day (D. T.), 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22 and 23.
Notes on the geological position of petroleum reservoirs in southern Kentucky and Tennessee, Safford, 9.
Oil and gas developments in Tennessee, Munn.
Oil boom in Tennessee, Schmits.
Oil region of Tennessee, with some account of its other resources and capabilities, Killebrew, 4.
Report of a geological reconnaissance of the lands, freehold and leasehold of the Cumberland Basin Petroleum and Mining Company, Elly.
Statistical reports, Shiflett, 4, 5, 6, 7, 8 and 9.
Well records, Lines.

Onyx.

Resources of East Tennessee, Southern Railway, 2.

Ordovician.

Cincinnati group in Western Tennessee, between Tennessee River and the Central Basin, Foerste, 5.
Variation in the thickness of the subdivisions of the Ordovician of Indiana, Foerste, 6.

Overton County.

Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Soil survey of Overton County, Ayrs and Hill.
Standingstone folio, Campbell, 1.

Paleontology.

A critical summary of Troost's unpublished manuscript on the cri- noids of Tennessee, Wood (Elvira).
Association of the gastropod genus Cuclora with phosphate of lime deposits, Miller (Arthur M.).
Camden chert of Tennessee and its Lower Orisksy fauna, Safford and Schuehert.
(Catalogue of) Paleozoic sponges of North America, Head (W. R.).
Paleontology—Continued.

Contributions to the coal flora of Tracy City, Brown (C. S.).
Correlation papers, Cretaceous, White (C. A.).
Description d'un nouveau genre de fossiles, Troost, 11.
Description of a new species of fossil asterias, Troost, 14.
Description of new and remarkable fossils from the paleozoic rocks, Miller and Gurley, 2.
Description of new forms of upper Cambrian fossils, Walcott, 5.
Description of new species of Fossil Crustacea from the Lower Silurian of Tennessee, Safford and Vodges.
Description of new species of paleozoic echinodermata, Miller and Gurley, 4.
Description of some more species of invertebrates from the paleozoic rocks, Miller and Gurley, 6.
Die Silurische Fauna des westlichen Tennessee, Roemer.
Exhibition of certain bones of Megalonyx not before known, Safford, 26.
Finding of the remains of the fossils slot at Big Bone Cave, Tennessee, Mercer.
Gastropoda of the Chazy formation, Raymond.
List of Tennessee Crinoids, Troost, 22.
New and interesting species of paleozoic fossils, Miller and Gurley, 3.
New genera and species of Echinodermata, Miller and Gurley, 5.
New species of crinoids from Illinois and other States, Miller and Gurley, 1.
New species of Echinodermata and a new crustacean from the paleozoic rocks, Miller and Gurley, 7.
New species of paleozoic invertebrates from Illinois and other States, Miller and Gurley, 8.
Notes on the Middleton formation of Tennessee, Mississippi and Alabama, Safford, 29.
Notes on fossils from Tennessee, Winchell (A.), 3.
(Note on) tooth of Petalodus ohioensis, Safford, 46.
On the faunal relations of some of the geologic groups of the eastern United States, Rogers (W. B.).
On the gigantic remains which characterized the Transition series of the valley of the Mississippi, Troost, 3.

Paleontology—Continued.

On the localities in Tennessee in which bones of gigantic mastodon and Megalonyx Jeffersonii are found, Troost, 2.
On the Pentremites reinwardtii, a new fossil, with remarks on the genus Pentremites, etc., Troost, 1.
On some fossils of recent formations, Lesquerenx, 2.
On species of fossil plants from the Tertiary of Mississippi, Lesquerenx, 1.
On Silurian and Devonic Cystida and Camarocrinus, Schuchert, 2.
On the species of calceola found in Tennessee, Safford, 39.
Paleontology (of New York), Hall (J.), 5.
Palaeospongioleologie, Rauff.
Remains of the mastadons recently found in Tennessee, McCallie, 3.
Remarks on some fossil bones recently brought to New Orleans from Tennessee and from Texas, Carpenter.
Remarks on the genus Tetradium with notice of the species found in Middle Tennessee, Safford, 38.

Perry County.

Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Oil and gas developments in Tennessee, Munn.
Tennessee phosphates, Hayes 12, and 17.
Tennessee white phosphates, Hayes, 2.
Terrestrial magnetism, Faris, 3.

Petroleum.

Oil and gas developments in Tennessee, Munn.
Standingstone folio, Campbell, 1.
Wartburg folio, Keth, 4.

Phosphate.

A brief reconnaissance of the Tennessee phosphate fields, Hayes, 20.
A new and important source of phosphate rock in Tennessee, Safford, 17.
Columbia folio, Hayes and Ulrich.
Commercial development of the Tennessee phosphate, Memminger.
Geological relations of the Tennessee brown phosphate, Hayes, 21.
Handbook of Tennessee, Paine.
Horizon of phosphate rocks in Tennessee, Safford, 18.
BIBLIOGRAPHY OF TENNESSEE GEOLOGY.

Phosphate—Continued.
Mining Tennessee phosphates, Keyes. 102
Phosphate deposits of Tennessee during 1897, Brown (L. P.), 1.
Phosphate deposits of the United States, Van Horn. 1.
Phosphates deposits of the southern States, Brown (L. P.), 3.
Phosphate deposits of Tennessee, Killebrew, 10.
Phosphate deposits in Maury County, Tennessee, Killebrew, 9.
Phosphate deposits of Tennessee, Killebrew, 17.
Phosphate of Tennessee, Meadows and Brown.
Phosphate mining in Tennessee, Ruhm, 1.
Phosphate rocks of Tennessee, Phillips, 2.
Phosphate rock, Ewing.
Phosphate rock in the South, O'Neal. Present and future of the Mt. Pleasant phosphate field, Ruhm, 2.
On the phosphate rocks of Tennessee, Phillips, 1.
Southern Railway territory, Southern Railway, 1.
Statistical reports. Hargis, 1; Lloyd, 2; Shiflett, 1, 2, 3, 4, 5, 6, 7, 8 and 9.
Tabulated analyses of commercial fertilizers, Thompson.
Tennessee phosphates, Hayes, 17, 12 and 25; Johnson (R. O. D.).
Tennessee phosphate rocks, Safford, 45.
Tennessee phosphate fields, Ruhm, 3.
Tennessee phosphate mines during 1897, Brown (L. P.), 8.
Tennessee phosphate field, Brown, (L. P.), 7.
White phosphate of Tennessee, Hayes, 18.
White phosphates of Decatur County, Eckel, 2.

Physiography—Continued.
On the physical geology of Tennessee and adjoining districts in the U. S., Hull.
Origin of cross valleys, Davis, 1.
Physio-geographical and agricultural features of the States of Tennessee and Kentucky, Safford, 12.
Physiography of the Chattanooga district in Tennessee, Georgia and Alabama, Hayes, 19.
Physical topography in its relation to medicine, Currey, 3.
Some stages of Appalachian erosion, Keith, 1.
Southern Appalachians, Hayes, 11.
The Appalachian River in eastern Tennessee, White (C. H.).
The Cherokee Nation of Indians, Roysce.
The Cretaceous and Tertiary peneplains of eastern Tennessee, Dodge.
The Geology of Tennessee, Safford, 49.
The geomorphology of the southern Appalachians, Hayes and Campbell.
The Tertiary history of the Tennessee River, Johnson (D. W.).
The topography, geology and water supply of Sewanee, Safford, 49.

Pickett County.
Oil and gas developments in Tennessee, Munn.
Standing stone folio, Campbell, 1.

Pleistocene.
On the relationship of the Pleistocene to the pre-Pleistocene formations of the Mississippi basin south of the limits of the glaciation, Chamberlain and Salisbury.

Polk County.
A brief notice of some facts connected with the Ducktown, Tenn., copper mines, Tuomey.
Analysis of Idocrase from Ducktown, Mallett.
Cleveland folio, Hayes, 14.
Copper deposits of the eastern United States, Weed, 3.
Copper deposits of the Appalachian states, Weed, 4.
Copper mines of the United States, Weed 2.
Polk County—Continued.

Ducktown copper mining district, McCallie, 1.
Ducktown ore deposits and the treatment of the Ducktown copper ores, Henrich.
Ducktown, Tenn. copper mining district, Brewer (Wm. M.), 1.
Erosion at Ducktown, Glenn, 7.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Minerals of the copper mines at Ducktown, Kemp, 2.
Mining and smelting copper in the Ducktown district, Higgins, 2.
Notes and recollections concerning the mineral resources of northern Georgia and western North Carolina, Blake, 1.
On the copper lodes of Ducktown in east Tennessee, Austed.
Terrestrial magnetism, Bauer, 1.
The deposits of copper ores at Ducktown, Tenn., Kemp, 3.
Types of copper deposits in the southern United States, Weed, 5.

Powell's River.

Examination of Powell's River, King, 55.
Examination of Powell's, Clinch and Emory Rivers, McFarland (Walter), 3.
Preliminary examination of Powell's River, Kingman, 14.
Profiles of rivers (in Tennessee), Gannett, 6.

Putnam County.

Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Kilblebrew and Safford, 2.
Oil and gas developments in Tennessee, Munn.
Standingstone folio, Campbell, 1.
Terrestrial magnetism, Bauer, 2.

Pyrite.

Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Kilblebrew and Safford, 2.

Rainfall.

Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Kilblebrew and Safford, 2.
In Gibson County, Morgan and McCrory.

Red River.

Examination of Red River, King, 57.
Improvement of Red River, King, 20, 25, 42 and 53.

Rhea County.

Chattanooga folio, Hayes, 9.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Kilblebrew and Safford, 2.
Kingston folio, Hayes, 8.
Pikeville folio, Hayes, 15.
Soil survey of the Pikeville area, Wilder and Gelb.
Terrestrial magnetism, Bauer, 1.
The Dayton coal mine explosion, Clute, 1.

Richland River.

Preliminary examination of Richland River, Kingman, 15.

River Improvement.

See under river by name; or Harts, King, Gooethals, Bingham, Biddle, Bergland, Banyard, Barden, Adams, Willard, Wetzal, Sears, Robert (Henry M.), Overman, Newcomer, Miller (A. M.), McFarland (Walter), Long, Knight and Kingman.

River Survey.

See under river by name or King, Gaw, Fitch, Biddle, Banyard, Barlow, Anon., 12, Willard, Wetzal, Suter, Sears, Roessler, Robert (Henry M.), Newcomer, McFarland (Walter), Knight and Kingman.

Roads.

Practical road building in Madison County, Tenn., Lancaster.
Progress reports of experiments with dust prevention, road preservation and road construction, Page, 3.
Progress reports of experiments with dust preventatives, Page, 1.
Public roads of Tennessee, Eldridge.
Tar and oil for road improvement, Page, 2.
BIBLIOGRAPHY OF TENNESSEE GEOLOGY.

Roane County.
- Geology of Tennessee, Safford, 22.
- Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
- Kingston folio, Hayes, 8.
- Loudon folio, Keith, 6.
- Tennessee marbles, Keith, 15.
- Terrestrial magnetism, Bauer, 1.
- The town of Cardiff — and lands and mines of the Cardiff Coal and Iron Company, Smalley.

Robertson County.
- Geology of Tennessee, Safford, 22.
- Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
- Oil and gas developments in Tennessee, Munn.
- Portland cement resources of Tennessee, Ulrich, 1.

Rutherford County.
- Description of a mass of meteoric iron discovered near Murfreesboro, Troost, 16.
- Geology of Tennessee, Safford, 22.
- Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
- Oil and gas developments in Tennessee, Munn.

Salt.
- Geology of Tennessee, Safford, 22.
- Introduction to the Resources of Tennessee, Killebrew and Safford, 2.

Saltpetre.
- Introduction to the Resources of Tennessee, Killebrew and Safford, 2.

Sand.
- Geology of Tennessee, Safford, 22.
- Orange sand, Lagrange and Appomattox, Hilgard (E. W.), 2.
- Statistical reports, Shiflett, 4, 5, 6, 7, 8 and 9.

Sandstone.
- Geology of Tennessee, Safford, 22.
- Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
- Statistical reports, Shiflett, 1, 2, 3, 4, 5, 6, 7, 8 and 9.

Sandstone-Iron.
- Geology of Tennessee, Safford, 22.
- Underground water resources, Glenn, 6.

Savannah River.
- Examination for a canal to connect the waters of the Savannah River with those of the Hiwassee and Tennessee, King, 56.

Scott County.
- Briceville folio, Keith, 7.
- Geology of Tennessee, Safford, 22.
- Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
- Oil and gas developments in Tennessee, Munn.
- Southern Appalachian coal field, Hayes, 23.
- Terrestrial magnetism, Bauer, 1.
- Warburg folio, Keith, 4.

Sequatchie County.
- Chattanooga folio, Hayes, 9.
- Geology of Tennessee, Safford, 22.
- Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
- Oil and gas developments in Tennessee, Munn.
- Pikeville folio, Hayes, 15.
- Profiles of rivers (in Tennessee), Gannett, 6.
- Sewanee folio, Hayes, 10.
- Terrestrial magnetism, Bauer, 1.

Sequatchie River.
- Preliminary examination of Sequatchie River, Robert (Henry M.), 5.

Sevier County.
- Geology of Tennessee, Safford, 22.
- Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
- Knoxville folio, Keith, 5.
- Maynardville folio, Keith, 16.
- Tennessee marbles, Keith, 15.
- Terrestrial magnetism, Bauer, 1.

Shelby County.
- Artesian-well pumps at Memphis, Engineering Record.
- Clays of West Tennessee, Nelson.
- Drainage of the river bottoms and swamp lands of West Tennessee, Cooper.
- Formations and artesian wells of Memphis, Safford, 14.
- Geology of Tennessee, Safford, 22.

- Underground water resources, Glenn, 6.
- Water supply of Memphis, Safford, 14.
Silver.
Cranberry folio, Keith, 13.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Ten-
nessee, Killebrew and Safford, 2.

Slate.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Ten-
nessee, Killebrew and Safford, 2.
Knoxville folio, Keith, 5.
Loudon folio, Keith, 6.
Southern Railway territory, Southern
Railway, 1.

Smith County.
Description of three varieties of me-
teoric iron, Troost, 18.
Fluorite and barite in Tennessee, Watson, 2.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Ten-
nessee, Killebrew and Safford, 2.
Oil and gas developments of Ten-
nessee, Munn.

Soapstone.
Asheville folio, Keith, 11.
Cranberry folio, Keith, 13.

Soil.
Cumberland coal field, Ashley, 2 and 3.
Geological and mineral resources of part of the Cumberland Gap coal
field, Ashley and Glenn.
Geology of Tennessee, Safford, 22.
Report on the culture and curing of tobacco in the United States, Kil-
lebrew, 5.
Review of the general soil map of the
Cotton States, Hilgard (E. W.), 4.
Soll survey of Coffee County, McLen-
don and Zappone.
Soll survey of Davidson County,
Smith and Bennett.
Soll survey of Giles County, Tenn.,
Arys and Gray.
Soll survey of Grainger County,
McLendon and Lyman.
Soll survey of Henderson County,
Carr and Bennett.
Soll survey of Lawrence County,
Mooney and Arys, 2.
Soll survey of Madison County, Ly-
man, Bennett and McLendon.
Soll survey of Overton County, Arys
and Hill.
Soll survey of the Greeneville area,
Mooney and Arys, 1 and 3.
Soll survey of the Pikeville area,
Wilder and Gelb.
The soils of Tennessee, Vanderford.

Statistical Reports.
Biennial report of A. J. McWhirter,
Commissioner of Agriculture, Mc-
Whirter, 1.
Biennial report of the Bureau of Ag-
culture, Statistics and Mines,
Hord.
Biennial report of the Commissioner
of Agriculture, McWhirter, 2.
Eleventh, Twelfth and Thirteenth annual reports of the Mining De-
partment, Shiflett, 3.
Nineteenth annual report of the Mining Department, Shiflett, 9.
Report of C. L. Jungerman, Assistant
Geologist of the Bureau of Agri-
culture, Statistics and Mines, Jung-
erman.
Report of Jo C. Guild, Inspector of
Mines, Guild, 2.
Report of the Bureau of Labor, Sta-
tistics and Mines, Wood (A. H.),
(Sixth annual report).
Report of the Bureau of Labor, Sta-
tistics and Mines, Hargis, 2. (Sev-
enth annual report).
Report of the Bureau of Labor, Sta-
tistics and Mines, Shiflett, 1,
(Ninth annual report).
Report of the Bureau of Labor, Sta-
tistics and Mines, Shiflett, 2,
(Tenth annual report).

Stewart County.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Ten-
nessee, Killebrew and Safford, 2.
Portland cement resources of Ten-
nessee, Ulrich, 1.

Stone—Building.
Asheville folio, Keith, 11.

Illustrations of polished rock sur-
faces, Morgan (H. J.).
Knoxville folio, Keith, 5.
Loudon folio, Keith, 6.
McMinnville folio, Hayes, 16.
Maynardville folio, Keith, 16.
Morristown folio, Keith, 17.
Notice of the Oolitic formation in
America, etc., Lea (I.).
Stratigraphy—Continued.

Notes on the Middleton formation of Tennessee, Mississippi and Alabama, Safford, 20.
Observations on the unification of geological nomenclature, with special reference to the Silurian formation of North America, Miller (S. A.), 1.
On the Cretaceous and superior formations of western Tennessee, Safford, 8.
On the relations of the middle and upper Silurian, Hall (J.), 7.
Remarks on the drift of the Western and Southern States, Hilgard (E. W.), 6.
Remarks on the formations comprised under the terms "Orange sand", McGee, 6.
Remarks on the relative age of the Niagara and the so-called Lower Helderberg groups, Worthen.
Remarks on the tacnic system, Stevens.
Remarks on the thickness and identity of the Calciferous formations from Canada to Tennessee, Walcott, 3.
Silur-fauna des westlichen Tennessee, Roemer.
Tennessee, Safford, 13.
The age and origin of the LaFayette formation, Hilgard (E. W.), 8.
The Columbia formation in the Mississippi embayment, McGee, 5.
The LaFayette formation, McGee, 4.
The Loess of the Mississippi valley and the aeolian hypothesis, Hilgard (E. W.), 5.
The Middleton formation of Tennessee, Mississippi and Alabama, Safford, 33.
The upland geological formations of Obion, Dyer, Lauderdale, Tipton and Shelby Counties—Safford, 53.
Use of the term Linden and Clifton limestones in Tennessee geology, Foerste, 3.
Utica slate and related formations of the same geological horizon, Walcott, 1.

Cambrian.
Cambrian system of the United States and Canada, Walcott, 2.
Notes on the Cambian rocks of Virginia and the southern Appalachians, Walcott, 6.
Stratigraphy—Continued.

Pre-Cambrian geology of North America, Van Hise.
Remarks on the thickness and identity of the Calciferous formation, Walcott, 3.

Carboniferous.
Carboniferous of the Appalachian Basin, Stevenson, 2.

Cretaceous.
Correlation papers, Cretaceous, White (C. A.).
On the Cretaceous and superior formations of western Tennessee, Safford, 8.
The Cretaceous and Tertiary plains of eastern Tennessee, Dodge.

Devonian.
Correlation papers, Devonian and Carboniferous, Williams.
Lower Carboniferous of the Appalachian Basin, Stevenson, 1.
On Marcellus and Hamilton of the south and west, Rogers (H. D.), 3.
Silurian and Devonian limestones of western Tennessee, Foerste, 4.

Ordovician.
A correlation of the lower Silurian horizons of Tennessee, with those of New York, Ulrich, 2.
Cincinnati group in western Tennessee, Foerste, 5.
Lower Silurian deposits of the upper Mississippi, Winchell (N. H.) and Ulrich.
On the parallelism of the Lower Silurian groups of Middle Tennessee with those of New York, Safford, 2.
Preliminary notes on Cincinnatian fossils, Foerste, 8.
Silurian basin of Middle Tennessee, Safford, 1.
Utica slate and related formations, Walcott, 1.
Variation in thickness of subdivisions of Ordovician, Foerste, 6.

Paleozoic.
Paleozoic intraformational conglomerates, Walcott, 7.

Quaternary.
Drift of southern States, Hilgard (E. W.), 6.
On the geological history of the Gulf of Mexico, Hilgard (S. F.).
Quaternary formation of the State of Mississippi, Hilgard (E. W.), 3.
Remarks on the formations comprising under the term "Orange sand", McGee, 6.
The Columbia formation, McGee, 5.

Stratigraphy—Continued.
The loess of Mississippi valley, Hilgard (E. W.), 5.

Silurian.
Die Silurische Fauna des westlichen Tennessee, Roemer.
Late Niagar an strata of West Tennessee, Pate and Bassler.
Silurian and Devonian limestones of Tennessee and Kentucky, Foerste, 1.
Silurian and Devonian limestones of western Tennessee, Foerste, 4.
Upper Silurian beds of West Tennessee, Safford, 7.
Use of the term Linden and Clifton limestones, Foerste, 2 and 3.

Tertiary.
Age and origin of the LaFayette formation, Hilgard (E. W.), 8.
Appomattox formation on the Mississippi embayment, McGee, 1.
Contributions to the Tertiary geology and paleontology of the United States, Hellprin, 2.
Lafayette formation, McGee, 4.
Mode of deposition of the LaFayette formation, Hilgard (E. W.), 7.
Orange sand, Lagrange and Appomattox, Hilgard (E. W.), 2.
Remarks on the formation comprised under the term "Orange sand", McGee, 6.
Southern extension of the Appomattox formation, McGee, 2.
Tertiary geology of eastern and southern United States, Hellprin, 1.
The lignite stage, Harris, 2.
The midway stage, Harris, 1.

Structural Geology.
Folded faults of the southern Appalachians, Keith, 12.
Fossiliferous sandstone dikes in the Eocene of Tennessee and Kentucky, Glenn, 2.
Geology of Chilhowee Mountain in Tennessee, Keith, 2.
Message from the President of the United States, Roosevelt.
Notes on the age and structure of the several mountain axes in the neighborhood of the Cumberland Gap, Shaler.
Note on a fine upthrow fault at Embreeville Furnace, Lesley, 2.
On a cross anticlinal in the coal measure of eastern Tennessee, Lesley, 3.
On the faults of southern Virginia, Lesley, 1.
**Structural Geology—Continued.**

On the physical structure of the Appalachian chain, etc., Rogers and Rogers.
Remarks on the changes which take place in the structure and composition of mineral veins, Whitney, 2.
The overthrust faults of the southern Appalachians, Hayes, 1.

**Sumner County.**
Bristol folio, Campbell, 2.
Description of the Roane Mountain Quadrangle, Keith, 8.
Economic geology of the Bristol and Big Stone Gap section, Boyd (C. R.), 2.
Estillville folio, Campbell, 3.
Geology of Tennessee, Safford, 22.
Greeneville folio, Keith, 3.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Soil survey of the Greeneville area, Mooney and Ayrs, 3.
Soil survey of the Greeneville area, Tenn.-N. C., Mooney and Ayrs, 2.
Terrestrial magnetism, Bauer, 1.

**Sumner County.**
A brief reconnaissance of the Tennessee phosphate fields, Hayes, 20.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Oil and gas developments of Tennessee, Munn.

**T.**

**Talc.**
Asheville folio, Keith, 11.

**Tennessee River.**
Examination for canal to connect the waters of the Savannah River with those of the Hiwassee and Tennessee, King, 56.
Examination of Tennessee River at Mocasinn Bend, Kingman, 8.
Improvement of Tenn. River, Biddle, 14 and 21; Barden, 6; Barlow, 5, 17, 24, 34, 35 and 54; Bingham, 5; Goethals, 1, 4, 5 and 7; Harts, 2, 9, 17 and 25; King, 11, 12, 27, 34, 45, 59, 68, 73, 75 and 76; Kingman, 2, 17, 29, 34 and 39; Knight, 6 and 15; McFarland (Walter), 4, 8, 11, 13 and 14; Newcomer, 4, 12 and 20; Overman; Robert (Henry M.), 7; Weitzel, 1, 2 and 3.
Preliminary report on survey of Tennessee River, Kingman, 9.

**Tennessee River—Continued.**
Report on examinations and surveys on the Tennessee River, Gav.
Report on examinations and surveys (made in 1830), Long.
Report upon survey of Tennessee River, Robert (Henry M.), 1.
Resurvey of the Tennessee River, Anon., 12.
Survey of the Tennessee River, Kingman, 1 and 2.
Tennessee River above Chattanooga, King, 80 and 81.

**Tennessee River—Muscle Shoals.**
Operating and care of Muscle Shoals canal, Barden, 5; Bingham, 4; Goethals, 2, 3, 6 and 8; Harts, 3, 8, 16 and 24.
Operating and care of Muscle Shoals, Kingman, 3, 18, 28, 33, and 38; Knight, 5 and 14; Newcomer, 3, 11 and 19.
Profiles of rivers (in Tennessee), Gannett, 6.
Tennessee River at Muscle Shoals, Newcomer, 8.

**Timber.**
Bricевille folio, Keith, 7.
Cranberry folio, Keith, 13.
Knoxville folio, Keith, 5.
Loudon folio, Keith, 6.
Maynardville folio, Keith, 16.
Morristown folio, Keith, 17.
Warburg folio, Keith, 4.
See Forests.

**Tipton County.**
Clays of West Tennessee, Nelson.
Drainage of the river bottoms and swamp lands of West Tennessee, Cooper.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Oil development in Tennessee, Munn.
Terrestrial magnetism, Faris, 2.
The upland geological formations of Obion, Dyer, Lauderdale, Tipton and Shelby Counties, Safford, 53.
Underground water resources, Glenn, 6.

**Titanium.**
Distribution of titanic oxide upon the surface of the earth, Dunnington.

**Trousdale County.**
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
BIBLIOGRAPHY OF TENNESSEE GEOLOGY.

Unaka.
Azolc system and its proposed subdivisions, Whitney and Wadsworth. Geology of Tennessee, Safford, 22.
Magnetic iron ores of the Unaka Mountains, North Carolina and Tennessee, N.
On Unakyte, an epidotic rock from the Unaka range, on the borders of Tennessee and North Carolina, Bradley, 1.
Round about Asheville, Willis, 2.

Unicoi County.
Asheville folio, Keith, 11.
Description of the Roane Mountain quadrangle, Keith, 8.
Greeneville folio, Keith, 3.
Mt. Mitchell folio, Keith, 9.
Terrestrial magnetism, Bauer, 1.

Union County.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Lead and zinc deposits of the Virginia-Tennessee region, Watson, 1.
Maynardville folio, Keith, 16.
Tennessee marbles, Keith, 15.
Terrestrial magnetism, Bauer, 1.
Zinc in eastern Tennessee, Clarke (W. C.), 2.

Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Terrestrial magnetism, Bauer, 1.

Water.
An inquiry into the present quality of the public water supply of Nashville, Brown (L. P.), 5.
Bibliographic review and index of papers relating to underground water, etc., Fuller.
Erosion, at Ducktown, Tennessee, Glenn, 7.
Filtering galleries as applied to the water supply of Nashville, McDonald.
Forestry and stream flow, Harts, 1.
Message from President of the United States, Roosevelt.
Mineral waters, Peale.
New well and hydraulic pumping at Peoria, Ill., Maury.
Notes on the wells, springs and general water resources of Tennessee, Glenn, 4.
Notes on the underground water of Tennessee and Kentucky, Glenn, 10.
Preliminary list of deep borings in the U. S., Darton.
Report of the Chief Engineer to the Water Supply and Sewerage Commissioners, Germany.
Report of water committee on public water supply for the city of Memphis, Hampton, et al.
Report on chemical analysis of Davidson County water, Day (Wm. C.), 2.
Report upon the results of boring at Memphis, Tenn., Wilson.
Slack water navigation and public health, Safford, 32.
Sources of contamination of Nashville drinking water Day, (Wm. C.), 1.
Statistical reports, Shiflett, 4, 5, 6, 7, 8 and 9.
Surface water supply of the U. S., Horton, Hall and Bolster.
The influence of forests on streams, Glenn, 11.
The mineral waters of the U. S., Crook.
The resources of the valley of the Cumberland River, Safford, 44.
BIBLIOGRAPHY OF TENNESSEE GEOLOGY.

Water—Continued.
The topography, geology and water supply of Sewanee, Safford, 49.
The water supply of Chattanooga, Rothmell and Eaton.
The water supply of Erin, Tennessee, Safford, 43.
The water supply of Memphis, Safford, 14.
The source of Nashville water supply, Walker.
Underground waters of Tennessee and Kentucky, Glenn, 6.

Water Power.
Appalachian powers, Southern Railway, 3.
Asheville folio, Keith, 11.
Cranberry folio, Keith, 13.
Greeneville folio, Keith, 2.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Knoxville folio, Keith, 5.
Loudon folio, Keith, 6.
Maynardville folio, Keith, 16.
Morristown folio, Keith, 17.
Relation of the southern Appalachian Mountains to the development of water power, Leighton, Hall and Bolster.
Resources of East Tennessee, Southern Railway, 2.
Some Tennessee water powers, Wilks.
The Nashville division, Southern Railway, 4.
Water powers and eligible sites for manufacturing industries, Killebrew, 15.
Water powers on eastern tributaries of the Mississippi, Greenleaf.

Water Resources.
Destructive floods in the U. S. in 1904, Murphy.
Engineers' report on the waterworks system of Memphis, Hilder, Omborg and Bell.
Index to the hydrographic progress reports of the U. S. Geol. Survey, Hoyt and Wood.
Papers on conservation of water resources, Leighton.
Profiles of rivers (in Tennessee), Gannett, 6.
Prof. Guyot's measurements of the Allegheny system, Gilman.
Report of progress of stream measurements for the year 1904, Hall, Johnson and Hoyt.

Water Resources—Continued.
Report of progress of stream measurements for 1905, Hall, Hanna and Hoyt.
Report on municipal water purification investigations, Schuerman.
Report on the waterworks system of Memphis, Lundie.
River surveys and profiles made during 1903, Hall and Hoyt.
Surface water supply of Ohio and lower eastern Mississippi River drainages, Hall, Grover and Horton.
The quality of surface waters of the U. S., Dole.

Wayne County.
Cincinnati group in western Tennessee, Foerste, 5.
Description of some new species of invertebrates from the paleozoic rocks of Illinois and adjacent States, Miller and Gurley, 6.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Silurian and Devonian limestones of western Tennessee, Foerste, 4.
Tennessee phosphates, Hayes, 12 and 17.
Terrestrial magnetism, Faris, 3.

Weakley County.
Geology of Tennessee, Safford, 22.
Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
Terrestrial magnetism, Faris, 3.

Wells—Artesian.
Artesian-well pumps at Memphis, Tenn., Engineering Record.
Formations and artesian wells of Memphis, Tenn., Safford, 14.

Well-Boring.
Record of well-boring in Warren County, Satterfield.

West Tennessee.
A second visit to North America, Lyell.
Clays of western Kentucky and Tennessee, Crider.
Clays of West Tennessee, Nelson.
Clays of the United States, Ries.
Drainage of the river bottoms and swamp lands of West Tennessee, Cooper.
Drainage problems of Tennessee, Ashley, 6.
## BIBLIOGRAPHY OF TENNESSEE GEOLOGY.

### West Tennessee—Continued.

- Die Silurische Fauna des westlichen Tennessee, Roemer.
- Geology of the Mississippi embayment, Dabney.
- Geology of Tennessee, Safford, 22.
- Geology of West Tennessee, Tenney, 1.
- Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
- Midway stage, Harris, 1.
- Mississippi valley, its physical geography, etc., Foster (J. W.).
- Observations of the geological structure of the valley of the Mississippi, Nuttall.
- On some fossil plants of recent formations, Lesquereux, 2.
- On some species of fossil plants from the Tertiary of Mississippi, Lesquereux, 1.
- On the elevation of the banks of the Mississippi, Usher.
- Regions of West Tennessee sulphur waters and chalybeate waters, Safford, 52.
- Silurian and Devonian limestones in western Tennessee, Foerste, 4.
- Silu-Fauna des westlichen Tennessee, Roemer.
- Stoneware and brick clays of western Tennessee and northwestern Mississippi, Eckel, 3.
- The economic and agricultural geology of the State of Tennessee, Safford, 47.
- The Loess of the Mississippi valley and the aeolian hypothesis, Hilgard (E. W.), 5.
- Underground water resources, Glenn, 6.

### White County.

- Geology of Tennessee, Safford, 22.
- Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
- McMinnville folio, Hayes, 16.
- Oil and gas developments in Tennessee, Munn.
- Pikeville folio, Hayes, 15.
- Standingstone folio, Campbell, 1.
- Terrestrial magnetism, Faris, 1.

### Williamson County—Continued.

- Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
- Tennessee phosphates, Hayes, 12.

### Wilson County.

- Geology of Tennessee, Safford, 22.
- Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
- Oil and gas developments in Tennessee, Mun.

### Wolf River.

- Preliminary examination of Wolf River, Roessler; Fitch.

### Zinc.

- Geology of Tennessee, Safford, 22.
- Greeneville folio, Keith, 3.
- Introduction to the Resources of Tennessee, Killebrew and Safford, 2.
- Lead and zinc deposits of the Virginia-Tennessee region, Watson, 1.
- Les princeipeaux gisements de minéraux de zinc des Estats-Unis d'Amérique, Demaret.
- Maynardville folio, Keith, 16.
- Mineral resources along the line of the East Tennessee-Virginia and Georgia division of the Southern Railway, Brewer (Wm. M.), 2.
- Morristown folio, Keith, 17.
- Production and properties of zinc, Ingalls.
- Recent zinc mining in East Tennessee, Keith, 10.
- Southern Railway territory, Southern Railway, 1.
- Statistical reports, Shiflett, 1, 2, 3, 4, 5, 7, 8 and 9.
- The Nashville division, Southern Railway, 4.
- Zinc belt of Claiborne and Union Counties, Tennessee, Clarke (W. C.), 2.
- Zinc deposit of Tennessee, Gordon, 3.
- Zinc in eastern Tennessee, Clarke, (W. C.), 2.
- Zinc mining in Tennessee.

### Zircons.

- Note on zircons in Unaka magnetite, Blake, 2.

BIBLIOGRAPHY OF TENNESSEE GEOLOGY.

Publications of the State Geological Survey of Tennessee

The following list shows the publications issued by the State Geological Survey or in preparation at the time this bulletin goes to press, March, 1911. Except for five hundred copies of each publication (which are reserved for sale at the cost of printing), the bulletins will be sent free on request, accompanied by stamps, made to the State Geologist, Capitol Annex, Nashville, Tenn.

Bulletin No. 1.—Geological work in Tennessee (Parts A and B issued).
   A. The establishment, purpose, object and methods of the State Geological Survey; by Geo. H. Ashley; 33 pages, issued July, 1910; postage, 2 cents.
   B. Bibliography of Tennessee and related subjects; by Elizabeth Cockrill.

Bulletin No. 2.—Preliminary papers on the Mineral Resources of Tennessee; by Geo. H. Ashley and others. (Parts A, E and G issued.)
   A. Outline introduction to the Mineral Resources of Tennessee; by Geo. H. Ashley; issued September 10, 1910; postage, 2 cents.
   C. The iron ores of Tennessee; by R. P. Jarvis (in preparation).
   E. Oil and gas development in Tennessee; by M. J. Munn (issued). postage, 2 cents.
   F. The phosphate deposits of Tennessee; by Lucius P. Brown (in preparation).
   G. Zinc Mining in Tennessee; by S. W. Osgood (issued); postage, 1 cent.

Bulletin No. 3.—Drainage Reclamation in Tennessee; 74 pages; issued July, 1910; postage, 3 cents.
   B. Drainage of Rivers in Gibson County, Tennessee; by A. E. Morgan and S. H. McCrory; pp. 17-43; postage, 1 cent.
   C. The Drainage Law of Tennessee; pp. 45-74; postage, 1 cent.

Bulletin No. 5.—Clay deposits of West Tennessee; by Wilbur A. Nelson (in press).

Bulletin No. 7.—Water Resources of Tennessee; by L. C. Glenn (in preparation).

Bulletin No. 9.—Studies of the Forests of Tennessee.
   A. An investigation of the forest conditions in Tennessee; by R. Clifford Hall (in preparation).
   B. A study of the growth of the second growth hardwoods; by W. W. Ashe (in preparation).

Bulletin No. 10.—The marbles of East Tennessee, illustrated with colored plates; by C. H. Gordon (in preparation).

Bulletin No. 11.—Preliminary report on copper deposits of Polk County; by W. H. Emmons (in preparation).

Bulletin No. 12.—The undeveloped small water powers of Tennessee; by J. A. Switzer and Geo. H. Ashley (in press).
